# MICHIGAN DEPARTMENT OF CIVIL RIGHTS DIVISION OF DEAF AND HARD OF HEARING

A public hearing to receive public comment on the following proposed administrative rules:

General Interpreter - General Rules

At Michigan School For The Deaf,

1235 West Court Street

Flint, Michigan,

Commencing at 9:00 a.m.,

Saturday, April 5, 2014,

Before Rhonda M. Foster, RMR, RPR, CSR-3612.

- 1 Flint, Michigan
- 2 Saturday, April 5, 2014
- 3 About 9:20 a.m.

- 4 DIRECTOR MATT WESAW: Good morning, everyone.
- 5 We are going to start, get started with some basics.
- 6 We still have some people who are in line getting
- 7 signed in. I just want to cover a few things before we
- 8 actually start taking testimony.

Everyone who wants to speak should have got a

card like this. In the upper right-hand corner is a

number; the order of which you will be speaking. So

when -- I will be calling off the different names and

the number. So as your number gets closer, start

working your way down to the microphone. That will be

helpful. So far we are up to 40 speakers, so we are

here by 12:30 for another function.

So if you -- I will cover this again in a minute, but if you don't get an opportunity to present, the public comment period is open, you can submit your comments until the end of the day, April 7th. So please review the information on the sheets here.

Basically, be mindful of the time. The number in the box above corresponds in the order in which you will be called. Your comments will be part of the official

going to have a full morning. We do have to be out of

1	record.
2	Please be respectful of all others at all
3	times. And please focus your comments on the rule.
4	This is not a Q and A time. This is for your this
5	is your opportunity to come up and comment on the
6	rules. If the panel who I will identify in a second
7	has a question of you, they can ask the question, but
8	that really is the only give or take that we will have.
9	If you come up to make comments, please spell
10	your name slowly so the interpreters pick it up, and
11	also for the court reporter for the official record,
12	and the CART lady so that she has the ability to get
13	your name accurately.
14	And again, please watch your number, and when
15	you start to get close, just kind of make your way up
16	to the podium.
17	Okay. Before we begin, I would like to thank
18	all the people who have worked tirelessly getting the
19	rules and the regulations prepared for this public
20	meeting. I know that I will leave people off, but I
21	wasn't here the first time around, but please note your
22	efforts did not go unrecognized.
23	I would first like to thank Sheryl Emery and
24	Dan Levy for all their tireless work, and the other

members of the Rules Committee, the Division staff,

1	Karlee Rose, Amanda Niven, and Christine Hill, for
2	their efforts in developing most of what you see in the
3	current proposed draft.
4	I would also like to publicly thank them for
5	their work in preparing for this public hearing in all
6	the Advisory Council Meetings.
7	If I can just ask those people to stand real
8	briefly that I just mentioned. Christine is over here.
9	Dan is down there. I don't see Sheryl.
L 0	I would like to thank the members of the
11	Advisory Council, Chair Mel Whalen, who was out today
L2	for some medical reasons. We are going to miss her.
13	Helen Boucher, Dianna McKittrick, Todd Morrison,
L 4	Franklyn Ash, who is the panel here. Frieda Morrison
L5	and Janet Juris, very instrumental in working on
L6	finding the best possible presentation we can make.
L 7	And also, I want to mention Chris Hunter and Maureen
L8	Wallace who are the authors of 204. I think we owe a
L 9	big round of applause for those two.
20	There are many more who have put their hearts
21	into drafting the document that will help to improve
22	the quality of life of the community. I need to
23	mention additional members of the Department, Lori
2.4	Vinson, who is out of town again on a family issue;

Leslee Fritz, the Deputy Director at the registration

Page 5 1 table. Their work to get us to this point cannot go 2 unmentioned. I thank you all for your contributions. And 3 also to you who have entered -- either sent in comments 4 already or are here present today to present your 5 6 comments. 7 I want to thank the interpreters who are here, helping us out. If you want to raise your hand, 8 9 we will recognize you, your efforts. 10 I would like to thank CART for being here, 11 and the court reporter. And a big thanks to the School For the Deaf for hosting us. 12 13 My name is Matt Wesaw, and I am the Director of the Department of Civil Rights. 14 15 Okay. Folks, now we are getting to the 16 official part. 17 This is a public hearing on the proposed administrative rules for the Deaf Persons' Interpreter 18 19 This hearing is being conducted on behalf of the 20 Department of Civil Rights Division on Deaf and Hard of 2.1 Hearing. 22 This hearing is being called to order at 23 9:20, April 5th, 2014, at the Michigan School For the Deaf in Flint, Michigan. 24

This hearing was published in three

1	newspapers of general circulation, as well as the
2	Michigan Register, Issue Number 5, of 2014, published
3	April 1st, 2014. This hearing is being conducted in
4	accordance with Public Act 306 of 1969, as amended,
5	also known as Administrative Procedures Act.
6	Again, my name is Matt Wesaw, and I will be
7	facilitating the hearing today.
8	Please know today's hearing will not be
9	conducted using a question and answer format. Instead,
10	we are here today to receive your comments on the
11	proposed rules. If you wish to speak, please make sure
12	that you have signed in, and indicate your desire to
13	speak on this card. We will call on speakers in the
14	order in which the comment cards were turned in.
15	When you come forward to speak, please
16	identify yourself with your name and address. Again,
17	slowly spell your name, as well as the organization you
18	represent, if you do, so that this information may be
19	transcribed into the hearing report.
20	Due to the large volume of participants who
21	wish to speak today, we are asking you to limit your
22	testimony to three minutes.
23	I have asked Lee Gonzales to be our
24	timekeeper. Lee will raise his hand when you have one

minute remaining. And then when you have reached the

1	three-minute mark, he will stand up.
2	Again, I ask you, please be respectful of the
3	time periods. We would like everybody to be able to
4	speak if possible.
5	If you have additional comments, you may
6	submit that in writing or ASL on video. You may leave
7	them at the registration desk today or submit them to
8	our Department no later than 5:00 p.m. on April 7th.
9	After the public hearing and the close of the
10	public comment period, the Department will consider all
11	comments and determine whether any changes to the
12	presently proposed rules are required.
13	The final rules will then be submitted for
14	final legal editing and review, and then submission
15	through the legislature.
16	We are not prepared to predict an effective
17	date for these rules, but do expect to present them to
18	the legislature in time for them to be promulgated
19	before the end of the current legislative session. We
20	are committed to that, folks.
21	Okay. There may be times during the comment
22	period where we may have to take a break for the
23	interpreters, or if things go fast and there is a lull,
2.4	we may take a quick break but we will appounce that

because it has to be official. And, again, we have to

1	be out of here at 12:30.
2	So I am going to call off the first three or
3	four presenters in their order. Presenter number one,
4	and I apologize if I mess up anybody's name, Gina
5	Colombo, you are number one; Debby Dietch is number
6	two; Roseline Lambert is number three; Karen Bailey,
7	number four; and Kathy Mitchell, number five. You
8	folks want to start making your way up.
9	Again, thank you all.
L 0	GINA COLOMBO (Through interpreter): Hello.
L1	My name is Gina, G-i-n-a, C-o-l-o-m-b-o.
12	Okay. I had a bad experience with the VRI
13	when I was in the hospital. Because there was a lack
L 4	of an interpreter, I was very frustrated with doctors
15	and such. And some doctors have not really been aware
16	of the laws providing interpreters. So I was hoping
L 7	that after the rules were passed and regulations, that
L8	we needed to have a card or something that we could
L9	present to the doctors and something that would tell
20	them that they needed to follow this law and rules.
21	Thank you.
22	DIRECTOR WESAW: Is Debby here? Please.
23	Also, if you change your mind, you do not have to
24	speak.

DEBBY DIETCH (Through interpreter): Hello.

My name is Debby Dietch, D-e-b-b-y, D-i-e-t-c-h. 1 2 So I have a hearing loss of 100 percent in one ear and 80 in the other. But I speak very well. 3 Ι have a situation where doctors think I am hearing 4 because I speak very well. So it is a very, very 5 difficult situation when they determine or they judge 6 7 whether or not I am deaf of hearing. But no matter what, if I request an 8 9 interpreter, they should respect my request. Because I 10 know I need one and they don't. And the other thing is that for interpreters, 11 I think it would be a good idea for them to become 12 13 certified. Because that would show that -- the level of their skill. And then we could be able to have that 14 effective communication for the deaf. 15 16 Thank you. 17 ROSELINE LAMBERT (Through interpreter): 18 Hello. Is someone voicing for me? Okay. Great. I 19 will voice for myself then. 20 My name is R-o-s-i-e, Rosie, Lambert, 2.1 L-a-m-b-e-r-t. 22 And I am here in support of my best friend. 23 She had a sad month last month and she wasn't able to 24 be here. Due to her advice, I have suggested that 25 police stations in this area who aren't aware of the

1	deaf, also the courts, as well her daughter went in
2	and informed the court that her mother was deaf, and
3	they didn't believe her, to come in and have a seat,
4	and she wasn't able to see, and so she had moved over.
5	So the police had told her to move, and she kept
6	saying, I can't hear, I can't hear. And they cuffed
7	her for no reason and put her up against the wall. And
8	her daughter was saying, my mother is deaf, she needs
9	an interpreter. And they put her in jail for four days
10	without an interpreter. And I choose not to name her,
11	but I ask for prayers, and I ask that you pray for the
12	Howell police station, actually all the police stations
13	everywhere. They need to be educated about deaf people
14	and what our rights are.

KAREN BAILEY (Through interpreter): My name is Karen, K-a-r-e-n, Bailey, B-a-i-l-e-y. I live in Ann Arbor.

2.1

And I wanted to say I moved to Michigan somewhat recently. And my experience with interpreters have been all over the board. Some interpreters have been excellent. And other interpreters, not so great. Some haven't been certified, or they have a low level certification. Some haven't been qualified for that particular situation, as well.

For example, I recently experienced a medical

	Page 11
1	emergency. And I was in St. Joe's Hospital. That
2	hospital had a contract with three agencies. But they
3	tended to use one particular agency because this agency
4	had cheaper rates. The interpreters had subpar
5	certification. So my service in the hospital was also
6	subpar. My communication with the doctor was not
7	great. I am DeafBlind. And I can't access VRI. So
8	again and again, I have had to tell them, I need a live
9	interpreter. And then they bring a live interpreter
10	who is not qualified. A live interpreter who didn't
11	know medical terminology.
12	So I want the rules to pass, and I want some
13	teeth behind it so we can force these businesses to
14	provide qualified interpreters.
15	Karen Bailey, B-a-i-l-e-y.
16	DIRECTOR WESAW: Coming up on the list,
17	Michael Morrison, Carole Mair, Kevin Morrison, and Pam
18	and Jeff Klock, K-l-o-c-k.
19	KATHY MITCHELL (Through interpreter): Good
20	morning. My name is Kathy, K-a-t-h-y, M-i-t-c-h-e-l-l.
21	I am a deaf social worker. And I have been
22	working for about 20 years. And I wanted to speak
23	specifically about the EIPA, which is the educational
24	interpreters.

About two days ago, I had gone into a

conference, and I was sitting with a U.S. Congressman
by the name of Ron Dellmus, D-e-l-l-m-u-s. And he was
making a comment that was really inspiring.
And I know coming in here this morning, as I

2.1

2.2

was driving, I was thinking about it. And I thought he is right. And I am so glad to see so many deaf people here. And I know your time is now to stand up and to speak out. Tell your legislators, tell them what experiences you had.

Let me tell you what he said. If you don't do anything, then who wins? The hearing people.

Hearing people are going to gain the control, and we can't let that happen.

I am the mother of three children. So I have the option to send them to public schools or to private schools to make sure that they have quality education. And they do fine.

My brother and sister have deaf children, and they struggle to make sure that those schools have good interpreters, and they struggle for equal access, while my children have no trouble at all. Deaf children didn't have that. And that's a big civil rights issue, equal access for language access.

So as I am reading about the EIPA and I see all these interpreters that are complaining about this.

	Page 13
1	They want to lower the standards. But I ask, why? Are
2	we going to accept that? I will not accept that for my
3	children. Deaf children should have the equal access
4	as my children are.
5	So please, continue with the (testimony
6	inaudible due to applause by audience).
7	So I am going to ask you, Mr. Wesaw, and I am
8	counting on you. You are representing us; then please
9	show us your support. And I was sad that I didn't see
10	you yesterday at the conference. And your assistant
11	did not stay to hear all the wonderful speakers, the
12	deaf speakers that were there. So I am hoping that
13	next time your staff would stay and show the support
14	for the union.
15	Thank you.
16	MICHAEL MORRISON (Through interpreter): I
17	was born and raised deaf. I have had lots and lots of
18	experiences. And then one thing that I really want to
19	talk about is the law.
20	Sorry. My name is Michael Morrison.
21	I was born and raised deaf. And I know this
22	world. I know the services aren't great.
23	And what we really, really, really want is
24	for you to go and vote. Please, go. Come on, raise

your hands. Who is going to vote? Raise your hands.

1	Shame on you. Everybody's hand should be up.
2	Remember, all of you, when we go to vote, you need to
3	be the ones in there. They need to see the numbers and
4	know that we have them. If you don't show up, then
5	they will think, oh, this community is not worth it.
6	So I am encouraging you to go, get your pass to go. We
7	need to get in there and show the officials. All
8	right? You with me? Come on. I don't see enough
9	hands. Who is deaf? Raise your hand. Who's deaf?
10	That's awesome. All right. We need to keep that
11	larger than the hearing.
12	CAROLE MAIR: (Through interpreter): Hello.
13	My name is Carole, C-a-r-o-l-e, don't forget the "e,"
14	M-a-i-r.
15	I had the experience last October where I was
16	taken to the emergency room at the hospital. The nurse
17	brought in the VRI. And, you know, my arm was like
18	this (indicating). I had they had attached my arm.

1	to say or what. I said, I don't know if they
2	understand me. I am trying to sign my best one-handed.
3	So anyways, they did a bunch of tests. And
4	they thought that I had a stroke.
5	Later on in the afternoon, my children showed
6	up, all of my children showed up. They are like, no,
7	no, no, no VRI. I said, I am stuck, look at my arm.
8	What do you want me to do? It was hard for me to keep
9	up with just the one hand that was working. And my
10	kids fought for me.
11	And they got a live interpreter for me.
12	Finally. Late in the afternoon, finally the
13	interpreter showed up. I am still like this with my
14	arm, I am still trying to sign, and I am still trying
15	to see if the interpreter is saying what I want to say,
16	if they are interpreting it accurately. And we finally
17	got things straightened out.
18	So please, please, please have live
19	interpreters all the time for deaf people in the
20	hospital.
21	Thank you.
22	KEVIN MORRISON (Through interpreter): My
23	name is Kevin Morrison, M-o-r-r-i-s-o-n.
24	I want to talk about VRI at the hospital too.

25

I will never forgot it. I haven't been able to forget

4		
1	it	
_	エ し・	•

2	My wife was pregnant, went into labor. We
3	asked for a live interpreter. Got an immediate no. We
4	use VRI. I said no, I want a live interpreter. My
5	wife was there. My wife was over here. The VRI was
6	way on the other side of the room. VRI never showed
7	up. Waited and waited and waited for over
8	15 minutes. And finally, you know, we requested we
9	want a live interpreter. And they said no, no, no. We
10	waited all afternoon, I think. And I will never
11	forget, we waited until like 2:30 in the morning. My
12	wife almost had to have a C-section, or a problem in
13	the hospital. They wanted me to write back and forth.
14	I kept saying wait. Communication wasn't any good.
15	Finally got a live interpreter, and we had successful
16	communication finally.

And then also court, a bad experience there,
I asked for an interpreter. They brought in an
interpreter, and I didn't -- I asked if they were
certified. I didn't think they were. I found out they
were. They didn't really sign professionally. It was
kind of stop and start and, you know, I complained to
my lawyer about the interpreter, and I got in trouble.
I got in trouble. I was just wanting to check their
certification and everything else, and I kept trying to

	Page 1/
1	tell them, that's the Court's responsibility to decide
2	if they are qualified or not; not mine. And if they
3	are not qualified, they should be excused until I get a
4	qualified interpreter.
5	So I really want this passed so I am not the
6	one getting punished, they should be the one getting
7	punished, and I have a voice to speak back.
8	Thank you.
9	DIRECTOR WESAW: Pam and Jeff are up. Are
10	they still here? Okay.
11	After Pam and Jeff, Nancy Asher. And I
12	apologize, this was tough to read, it looks like maybe
13	Bell Burdus (phonetic). Okay. He is leaving. Lynn
14	Sedlacko, Peter Virtue, and Danielle Ward are coming
15	up.
16	PAM KLOCK: Good morning. I am going to be
17	using my native language. Good morning. I am going to
18	be using my native language, which is English. And
19	because of the emotional nature of this, I am going to
20	be reading my remarks.
21	We have sent in a few letters discussing the
22	proposed rules and regulations governing sign language
23	interpreters in educational settings. And after
24	reading those public remarks that were submitted by
25	professionals that are employed here in Michigan in the

2.1

schools, we felt it was very important that we remind
you that at the heart of this entire discussion are our
minor children who depend on sign language for their
education, and on those interpreters that provide that
education.

Page 18

As parents of a profoundly deaf 11-year-old in a mainstream program, we think that letter supporting the lowering of the standards would affect his education and that of his peers. And that is not to their benefit to lower those standards. Under IPA our children are guaranteed an equitable education, and that would be impossible to provide with low certifications.

We have read numerous letters which suggest allowing educational interpreters a grace period to get the EIPA 4.0; yet none of those address the concerns of our child's education during that three-year improvement phase. And we are not willing as parents to put our child's education on hold for any length of time while people are brought up to speed.

There are also letters that talk about the flexibility in allowing elementary and secondary certification in either setting. And yet Boys Town, who administers the test, developed two separate and distinct platforms because students in elementary and

1	secondary settings have such vastly different
2	educational and language needs. And it is for that
3	reason that teachers in the state of Michigan also pay
4	elementary or secondary certifications.
5	Because we understand and the data that we
6	see, that EIPA on the average is lower than what we
7	have requested previously. We understand that maybe a
8	two-year period starting in September of 2016,
9	interpreters may have to be allowed in that have a 2.7.
10	The reason we are picking that number is because the
11	average retest increase is .3 to a .8 which would take
12	their level up to what we consider to be an acceptable
13	level of skills for our child.
14	In the educational community, if you and
15	Council are truly putting our children first and
16	protecting their rights to a fair and appropriate
17	education, you will uphold the proposed rules to
18	increase the certification for educational
19	interpreters.
20	And we would like to once more reiterate that
21	the systematic failure of allowing low standards will
22	ultimately affect our children for the rest of their
23	lives. And we ask that you put that bar high and you
24	keep it high for their well-being.

NANCY ASHER (Through interpreter): My name

1	is	Nancy	Asl	ner,	but	fr	iends	of	mine	call	me	Nan,	so
2	man	y of	you	know	me	as	Nan.

22

23

24

25

I am here as a hard of hearing advocate, and I wore hearing aids for over 45 years, and my concern, the way things are written, if you look at it, at the original PA 204, there was a definition that identified what a deaf person was. And I cannot find that definition anywhere anymore with the new rule or on the Office of Civil Rights or DOHH website. And the original rule said a deaf person means a person whose hearing is totally impaired or whose hearing with or without amplification is so seriously impaired that the primary need of receiving spoken language is through other sensory input including but not limited to lip reading, sign language, finger spelling or reading, which -- and that second part, it includes hard of hearing people or deaf, whatever you want to call us. And I am afraid this -- the way the rules are, you can't find a definition for deaf anymore, you can't find a definition for heard of hearing, and you can't find a definition for DeafBlind.

And it really needs to be in there because in 2006, State of Michigan versus Arnold DeMann, a hard of hearing person, because he didn't know sign language, the Courts ruled he was not deaf enough to need any

1	accommodations; that included interpreter, CART, lip
2	reading, anything. I really don't want this to happen
3	to other hard of hearing people because, you know,
4	that's me, and that's 1.2 million other people in
5	Michigan.
6	So that's my concern; hard of hearing are not
7	forgotten with all of this. As some of us do sign, but
8	most of us do not.
9	Thank you.
10	PETER VIRTUE (Through interpreter): My name
11	is Peter Virtue, V-i-r-t-u-e.
12	And I just had a thought, but I am going to
13	hold that for just a second. One of the things I see
14	before or I said before is that, you know, I didn't ask
15	to be deaf. You know, back in the 50s, doctors said
16	that, you know, around that time, you know, 1950s, you
17	know, your son needs his tonsils removed, you know,
18	because that's what they did back then, right? So my
19	tonsils were taken out. Nothing wrong with my tonsils
20	but they were taken out. You know, got an ear
21	infection, became deaf. So the medical profession made
22	me deaf. Therefore, the medical profession owes me

Now, I am sure most of you didn't ask to be deaf. How many -- some people, hey, I am deaf, we are

23

24

25

maybe.

1	happy we have deaf kids, but really we didn't ask to be
2	deaf, our kids neither. Did you? So you shouldn't be
3	punished with it. I didn't ask for the stigma of being
4	deaf. I didn't ask for that either, you know, I am
5	almost I would be like uncomfortable, I mean, like
6	alien, that's what it is like here.

2.1

I think five years ago, I had a heard attack. I was in the hospital. Had a very skilled interpreter who I am very thankful for, and no names here, but the doctor cured me, great job on the doctor.

But he told me with my beautiful interpreter, he told me that, you know, if you don't stop smoking, you are going to die. You know, probably two years from now, you are going to be having open heart surgery, another operation, and, you know, I didn't want to do that. So, you know, I thought that I was, you know, I mean, he told me, you have to do this and this and this, those things through the interpreter. The doctor rescued me physically, yes, he did. But my interpreter saved my life. Because they told me what the doctor said. Now, if I didn't, you know, quote, unquote, hear what they said, I would probably be dead by now. So, you know, I appreciate what my interpreter did.

Thank you, Helen.

	Page 23
1	LYNN SEDLACKO (Through interpreter): Hello.
2	My name is Lynn, L-y-n-n, S-e-d-l-a-c-k-o.
3	A few comments I would like to make. My
4	concern is that PA 204, I am speaking PA 204, but, you
5	know, does it really represent me? Does it really
6	represent the deaf community?
7	I was on maternity leave, I was concerned
8	about when I was on Admin leave, the Director of
9	DODHH, Sheryl, I am sure you, Mr. Warsaw, are making
10	sure that somebody is going to be representing us.
11	That's what I am concerned about.
12	You know, EIPA, new interpreters, those don't
13	really represent me. Karlee, she is new, so she
14	doesn't really represent me. I just want to make sure
15	that things that we have representation. And Amanda
16	does not represent us either. That's all I want to
17	say.
18	DIRECTOR WESAW: After Danielle we will have
19	Christopher Hunter, Renea Forrest, Madonna Newcomb,
20	Diane Antishin, Sandy Graham.
21	DANIELLE WARD: Good morning. I am Danielle
22	Ward, D-a-n-i-e-l-l-e, W-a-r-d. And I am speaking on
23	behalf of Joy Thomassen, J-o-y, T-h-o-m-a-s-s-e-n, and
24	she has her statement written and prepared.

As a former State of Michigan interpreter

1	cooldinator, I personally saw now legislation linked
2	the capability of DODHH and protection of us Michigan
3	citizens. Of particular note is the Deaf Persons'
4	Interpreters Act, which was passed in 1982 but not
5	admitted until 2007. If the author of the first act
6	realized how long it would take to successfully
7	accomplish an amendment, the original legislation might
8	have worked different, and included more settings and
9	professional expectations for all interpreters in
10	Michigan. These safeguards would have allowed the
11	DODHH to do more and support the community in a greater
12	way. Yet looking back over the span of 25 years, many
13	changes occurred within the Michigan deaf community and
14	on a national scale that could not necessarily have
15	been predicted. For example, national testing formats
16	were altered, reliability validity standards were
17	developed in response to lawsuits, and the need for
18	interpreters grew beyond the supply available.
19	The finalized rules have the potential of
20	combining reflective wisdom gleaned from looking back
21	and inciteful knowledge by realizing that the next
22	25 years hold many opportunities. To be
23	all-encompassing, broad language sometimes covers

greater territory so that changes in societal norms,

expectations and technology can be later applied to the

24

1	language chosen. And here are some reflective
2	forward-thinking considerations in light of the current
3	draft rules.
4	Number one, part one. If the definitions
5	establish a deaf interpreter as a State-created
6	standard, will Michigan have another QA system on its
7	hands? From my oversight of the State testing system
8	in the past, DODHH ran into numerous issues trying to
9	find funding and staffing to keep it rigorous and
10	reliable. Unless the guarantees and safeguards are in
11	place, does this definition really serve the deaf
12	community with excellence? Hopefully there are enough
13	resources to ensure standardized testing tools.
14	Also, does Michigan want to list out every
15	possible certification that currently exists? What
16	happens when state or national testing changes? Will
17	the rules have to be amended again? Might broader
18	terms like state certification and national
19	certification endure for more years?
20	Number two, might a minimum standard for
21	working in Michigan be that someone must possess state
22	or national credentials. But only listing those
23	presently given, Michigan risks missing improvements
24	and revisions that are bound to come in the future.
25	Thank you.

Τ	CHRISTOPHER HUNTER (Inrough Interpreter):
2	Hello. My name is Christopher, C-h-r-i-s-t-o-p-h-e-r,
3	H-u-n-t-e-r.
4	Many of you may remember me as the former
5	Director of DODHH for 27 years. I have heard many
6	people come up and speak about the different problems
7	that they have had with interpreters in hospitals and
8	other places, as well, and that is happening in such
9	capacity, the interpreter law back in 1982, I think it
10	was about 32 years ago, I think from that point on
11	there have been problems. So myself and Maureen
12	Wallace have worked tirelessly to work with legislators
13	about passing an amendment. And in 2007 finally, the
14	year that I retired, is when they passed a law. Prior
15	there were no rules. So now we are coming up with a
16	rule so that we can clearly define what it is that the
17	qualifications are that are required for working in
18	schools and doctors' offices, etcetera.
19	I sat on the committee for the first two
20	years to write this up for the first set of rules. And
21	we moved along. And now as I read it, I see how far it
22	has gone and how better it is now.
23	I want to tell you that the rules themselves
24	are not perfect. All of the rules within Government
25	are not perfect. And then later, as those changes and

2.1

Page 27

things are amended, they improve. But these are some
good rules, and I support everything that the rules say
about the interpreters' levels, about their skills,
duties, everything is so clear. We need to pass these.

Secondly, I want to speak about VRI. I am a supporter of VRI as an option. I think it is a wonderful technology, and I used it a lot in staff meetings within my office, because we didn't have an interpreter available, so I would use it.

These rules are written clearly to protect you. VRI, there must be a qualified interpreter. They have to have certain things set in place or they can't have it. If it is ineffective communication, then we need to tell them, like the person who was up here earlier that was speaking and talking about their arm being twisted around. It is too bad we didn't have the rules at that time. But in the future we will. So it will be a fair exchange. We have the right to change. So hopefully that will pass this year. We have been waiting seven years past retirement for it to pass.

RENEA FORREST: Good morning. My name is

Renea Forrest, R-e-n-e-a, F-o-r-r-e-s-t, and I am the

Manager of Interpreter Services for Henry Ford Health

System in Detroit. And I know that there has been a

lot of growth that has needed to occur, and I just

1	wanted to let you know that we are willing to grow and
2	learn and improve.
3	I also wanted to let you know that Henry Ford
4	Health System does support the stricter rule set.
5	(Applause).
6	Henry Ford Health System has a culture of
7	quality and safety. And we know that the deaf consumer
8	is the expert here. I am not the expert in what
9	effective communication is. Only you can tell me what
10	effective communication is.
11	Henry Ford also supports the consumer's
12	choice in effective communication when it comes to live
13	interpreters or VRI. Like I said, I wouldn't expect
14	you to tell me that I understand something. I can't
15	tell you that you understand something.
16	I have heard a lot of health systems are
17	opposed to these rules. I want to put on the record
18	Henry Ford Health System is in support of these
19	stricter rules.
20	Thank you.
21	(Applause).
22	MADONNA NEWCOMB (Through interpreter):
23	Hello. My name is Madonna, M-a-d-o-n-n-a, Newcomb,
24	N-e-w-c-o-m-b.

I have experienced my husband was taking his

1	VRI, and we requested an interpreter. It was very
2	frustrating. They brought in a nurse, who used some
3	sign, and that certainly wasn't what we wanted, so it
4	was very frustrating. My husband was in the hospital
5	for a week. And no interpreter showed up. And after
6	we went home, I wasn't even sure what to do because the
7	doctor never explained it. So like I said, it was very
8	frustrating. And I am hoping this law will pass.
9	DIANE ANTISHIN (Through interpreter): Hello.
10	My name is Diane, D-i-a-n-e, and last name Antishin,
11	A-n-t-i-s-h-i-n. I am from Saginaw.
12	And my partner was in for some therapy. And
13	so we had written down the interpreter's phone number
14	to give them, ten days ahead of time. So we came in
15	ten days later, and we were in for the meeting. And we
16	asked where was the interpreter. And they said, we
17	didn't have one. So we were very upset, and we had to
18	leave and go home. And that is all.
19	DIRECTOR WESAW: Next up after the speaker is
20	Shirley Fritz, Roberta Newvine, Marika Blumerick,
21	again, I apologize, Natalie Grupido, and Gail Green.
22	SANDY GRAHAM (Through interpreter): Hello.
23	My name is Sandy Graham, G-r-a-h-a-m.
24	And I want to speak to you about a job

situation that happened about two years ago. I had

	Page 30
1	seen that there was an open position as a nutritional
2	instructor, at MSU Extension in Novi. So I was excited
3	and nervous, and I had requested an interpreter. But I
4	wasn't thinking about requesting a qualified
5	interpreter. I assumed they knew what to do.
6	So they brought in an interpreter, I didn't
7	know who they were, and when I showed up for the
8	interview, the day of, there were four people on the
9	panel that were interviewing me. So I was quite
10	nervous. But before I had gone into the room for this
11	interview, I was chatting with the interpreter. And it
12	was uncomfortable. I didn't know if this interpreter
13	was qualified or not.
14	So we went in for the interview. And that
15	interpreter didn't understand my finger spelling. It
16	was a big struggle. So the people around had assumed
17	that it was me when it was the interpreter. This
18	interpreter didn't seem qualified, so I was quite
19	upset. So we got through the interview, and they said,
20	we will get in touch with you in about two weeks. So I
21	thought, okay. I left.
22	And two weeks passed and I never heard a
23	thing. So I thought something was up. I e-mailed the

secretary and told them I had not heard anything.

After a month, I e-mailed them again and I still

24

1	haven't heard anything. So I have some growing
2	concerns. So I didn't know what to do.
3	After two months, I had gone over to VR, and
4	I told them I still had not heard anything, vocational
5	rehab. It had been about four months, and I asked them
6	if they would get in contact with the secretary and
7	find out what had happened because I was very concerned
8	about the interpreter I had and whether or not that
9	affected my job interview. So they said that they
L 0	would get in contact with them and that they would
L1	they got in contact with them and said they would call
12	me for a second interview.
13	At that time, I had brought in a qualified
L 4	interpreter. And I found out that the first
15	interpreter that was brought in was only an educational
16	interpreter, and wasn't supposed to be doing community
L 7	work. So once they brought in the qualified
L 8	interpreter, it was much better, and the boss had even
L 9	noticed the interviewer had noticed that the
20	improvement and knew that it was the interpreter, not
21	me, and I got the job.
22	SHIRLEY FRITZ (Through interpreter): Hello,
23	hello, hello. Happy to see you all here. Out
24	supporting the oh, I am sorry. Let me back up.
25	Forgot my name

1	My name is S-h-i-r-l-e-y, Fritz, F-r-i-t-z.
2	This is going to be short and sweet and
3	simple. I believe that interpreters must be have
4	good quality for deaf people and also for deaf children
5	in the public mainstream school setting. And even the
6	teachers who teach ASL, as well. So please stand up.
7	And stand up for passing this bill.
8	Thank you.
9	ROBERTA NEWVINE (Through interpreter):
10	Hello. My name is Roberta, R-o-b-e-r-t-a,
11	N-e-w-v-i-n-e.
12	I am still talking about the VRI issue. I
13	have had to go for a lot of doctors' appointments.
14	Usually we have a live interpreter. But I am going to
15	talk about the hospitals in Saginaw, who VRI, VRI, VRI.
16	VRI saved us money in Saginaw. So I have heard that,
17	and I have heard that it is heard them say it is
18	about saving money.
19	Not long ago, I went in for some heart tests.
20	I went in there, they brought in the VRI, I was going
21	to see how they would work with VRI and how the test
22	would work using that. I don't know a lot about VRI.
23	I obviously or they didn't, they weren't trained,
24	they kind of fumbled around with it. I said, where am
25	I supposed to sit? They said, well, you are supposed

1	to sit on the bed over there. I said, okay, but the
2	VRI is over there. And they are like, no, well, it
3	doesn't work, so I stood there, you have to stand over
4	there. How can I see the VRI? No, that's where it is
5	going to stay. We have to fix it, you know, it took
6	like 15 minutes at least for them to, I don't know,
7	figure out what to do and kind of, you know, get it
8	over to where I was sitting. So I sat thinking. Oh,
9	they started with the tests, the setup, they just
10	really couldn't get it to work, they struggled for like
11	another half hour.
12	And then finally, they started the test.
13	They were standing over there. I am trying to see the
14	person who is signing, and it just it just did not
15	work out. Did not work out there at the hospital.
16	And the laptop itself just kind of went blank
17	and, you know, then they turned it, it would come back
18	on, everybody was all happy and, you know, it took a
19	lot of time, VRI, the laptop, it happened several
20	times. I am sorry, I just am sorry to say, it does not
21	work for everybody in a hospital setting, just sorry to
22	say.
23	MARIKA BLUMERICK: (Through interpreter):
24	Should I use it? Finger spell my name into the

microphone? All right.

1	My name is Marika B-l-u-m-e-r-i-c-k.
2	I support this law and the requirement for
3	the high quality of interpreters. I mean, you know,
4	sometimes we see people that work for agencies and they
5	have a name of the agency on. I think we don't need
6	that.
7	Also, at the hospital when we see
8	interpreters there, they don't seem to be under like
9	DODHH. That needs to stop.
10	I remember I gave a presentation in a
11	workshop and someone kept saying, stop, stop, stop. I
12	was a little paranoid because somebody was the
13	interpreter was crying. Obviously, I sign too fast and
14	they couldn't follow me. It really hit me hard, you
15	know, it looked bad, they needed to be certified.
16	Someone who could fit my communication sign. Someone
17	who can fit.
18	That's really all I want to say; thank
19	everybody for coming, and support this law.
20	NATALIE GRUPIDO (Through interpreter): This
21	is not deaf friendly.
22	Hello, I am Natalie, N-a-t-a-l-i-e,
23	G-r-u-p-i-d-o. I am a very proud deaf citizen of
24	Michigan.

And first of all, I want to say that, why is

	Page 35
1	this not so accessible to deaf people? Why is there no
2	live caption on a big screen? We have got English over
3	here. There is no we can't see anybody signing in
4	the background. We are supposed to be able to come up
5	and make comments. And all you can do is read the
6	English. So where do we get to see the signing? You
7	know, that's it.
8	VRI I agree that it doesn't really work. One
9	thing that we need to think about with VRI is the
10	interpreters on VRI. You know, here in Michigan, we
11	have these requirements, must have this, must have
12	this, must pass this level, must have this. VRI
13	interpreters don't have to. They don't have to. The
14	VRI interpreters could be in another state. They don't
15	have to meet the requirements that are here. They
16	don't have to register with DODHH. Does that mean that
17	all the interpreters can leave and go work for them
18	where it is easy without all the requirements? That's
19	a major concern that I have.
20	School districts that want to find a lot of
21	loopholes. Be careful, be careful. We have to require
22	them to be the highest certifying interpreters.
23	I have had enough. I am fed up. Knock it

happened a long time ago.

off. Now is the time for change now. Should have

24

Τ	what's the definition of sign language?
2	Please, it is not a sign, in the word language, you
3	know, it should be recognized just like any other
4	language. It is ASL. It is American Sign Language.
5	You know, how is it described? How do you describe
6	sign language? Please. Where it is American Sign
7	Language, it is a language, it has got this, that and
8	the other like every other language. Plain old English
9	is full of words and nouns and verbs. Yeah, we get it.
10	Put it down, American Sign Language, period.
11	I am mad. I am pissed off. You should be
12	too. The bill is already passed. The rules and regs
13	need to be done with. Stop wasting time. The
14	oppression needs to end now.
15	DIRECTOR WESAW: After Gail we will have Ron
16	and Linda Scripter, Ron Deschler, Gary Ford, and Joel
17	McRee.
18	GAIL GREEN (Through interpreter): I am
19	speaking for my husband. And he is in heaven right
20	now. And we had experience with VRI at Genesee
21	Hospital Genesys Hospital. At the time, my husband
22	was bedridden and he wasn't able to see the VRI in his
23	bed. He had many, many doctors, it was very
24	distracting. Who is talking when and where on VRI? It
25	was not satisfactory. I blew up with Genesys, and they

1	realized that VRI did not work for that patient.
2	And I am speaking for my husband. I love my
3	husband. I am not speaking for everybody else. I
4	really want to have a live interpreter; not VRI,
5	period.
6	INTERPRETER: Hello. My name is Ron
7	Scripter, S-c-r-i-p-t-e-r.
8	In 1964 and prior to, I was in public
9	schools. And I fell way behind in my education. At
10	that time, I was 14. And mentally, I was equal to a 9-
11	or 10-year old boy.
12	So I moved around to Durand schools. And
13	when I went in, the teachers told me I didn't belong
14	there. I was there for a week. And they said, you
15	don't belong. You should go to MSD. So they went over
16	and they spoke with my mother, and my mother asked me
17	and I said that would be fine. So we went.
18	I was supposed to be in 9th grade. They
19	placed me in 8th grade. I had to start 8th grade all
20	over again. Until I got into 10th grade. And then
21	finally, I understood how the education system worked.
22	I was on the honor roll from that point on, until I
23	graduated. So I am thankful to Durand for sending me
24	to MSD.

LINDA SCRIPTER (Through interpreter): Hello.

	Page 38
1	My name is Linda Scripter, S-c-r-i-p-t-e-r. There have
2	been many, many times that I have dealt with qualified
3	interpreters. And I had gone in with a sinus issue,
4	and I had asked a doctor for an interpreter. They said
5	they have one, and I thought, well, they are supposed
6	to be here right now. And then they called me in the
7	room and I said, I need an interpreter. And they said,
8	yeah, uh-huh.
9	And next thing I know, they bring out this
10	laptop. So we go on, and it really was very
11	frustrating. Because this interpreter was very, very
12	small. It was this tiny little picture. And we kept
13	going.
14	And so the doctor was talking to the nurse.
15	And I said, well, what are they saying? But she wasn't
16	able to hear them. So the VRI interpreter couldn't
17	hear a conversation going on in the room. I wasn't
18	into that VRI. So I would ask you to support.
19	Thank you.
20	RON DESCHLER (Through interpreter): Hey,
21	everybody. I went into the hospital in I am sorry.
22	My name is Ron D-e-s-c-h-l-e-r.
23	I have been into the hospital quite often in
24	the last two years for my wife. She is all right, but

the first time we came in, we had VRI. And prior to

	Page 39
1	that, somebody had told me that VRI was lousy, but I
2	wanted to see for myself. And that was when I couldn't
3	speak on it.
4	So we went into the hospital and they brought
5	out the VRI. We got to the VRI, and we understood that
6	there was this situation, so they had a hard time
7	setting it all up. And then finally we had it all set
8	up, and we didn't have any trouble at all with the
9	communication.
10	Once the doctor walked out of the room, we
11	waited, and they shut the system down. And my wife had
12	said something after, I can't remember what she had
13	said, so I went over to go tell the nurse, I had
14	written down just a simple question. Hold on a minute.
15	And then the nurse had to come back in and set up the
16	whole system again. And we had to wait and wait. So
17	finally they were able to get it to work, and I asked
18	one simple question and got an answer and that was it.
19	And I thought, what a waste of time. Why
20	couldn't we just answer the question of what I wanted
21	to know?
22	Secondly oh, I think I lost it. That must
23	be all. Thank you.
24	JOEL MCREE. My name is Joel McRee.

I am hearing, so I am going to try to sign

	Page 40
1	this the same time that I am talking. Okay. Okay.
2	You go ahead and interpret.
3	(Through interpreter): Last Tuesday, I spent
4	the night in the hospital with kidney stones. For
5	anybody who has experienced kidney stones, you can only
6	imagine how painful that is. I can't imagine being
7	deaf and trying to communicate to a doctor or to a
8	nurse what my need was at that point.
9	The reason why I bring this up is, becoming
10	aware of PA 204, the need for the deaf community to
11	have what they deserve, which is a qualified
12	interpreter at their side during a time of need. Be it
13	medical, be it court system, or some other reason, it
14	doesn't matter, it is life. You need that interpreter.
15	The American people should be ashamed of
16	themselves for not providing interpreters for the deaf
17	community as needed. Our politicians need to step off
18	the dollar and stop putting a monetary value to this.
19	There is no monetary value. It is infinitely valuable
20	for this.
21	Thank you.
22	DIRECTOR WESAW: Looking for Gary Ford.
23	Okay. Okay. After Gary, Tami Glenn, Brett Hollerback,
24	Millie Hursin, Mary Trayner, and Hanni Adams.

GARY FORD (Through interpreter): Welcome.

1	Му	name	is	Gary	Ford,	F-o-r-d,	and	this	is	my	wife,
2	Rok	oin Fo	ord								

2.1

My friend called me, and I went to visit in the hospital my friend. And I asked them the room number, and they told me it was upstairs. So I had gone in and found the room. And there was no one there to interpret at all. Staff came in and I asked, where is the interpreter? So you tell them the rest.

asked, where is the interpreter? And she said it wasn't her responsibility. So I told her it was her responsibility. And then she had to call the interpreter because it is the law so we could communicate.

GARY FORD (Through interpreter): So anyhow,
October 16th, my wife had been taken into the hospital.
And there was an emergency. And we weren't able to
explain what was going on. So I had to show them.
This part. And they said, okay. And they called, and
we waited. And an interpreter came finally. And, you
know, we were in the emergency room and we had to wait
and wait and wait and wait until we couldn't wait
anymore because my son was at home. So I said, please
take care of her. And then 4:00, she was finally taken
upstairs.

1	The next morning, I got up and I had taken
2	our son to school, and then I went to visit the
3	hospital. And the woman who was there in the morning
4	had a different there was a different interpreter
5	that was brought in. About an hour later, the
6	interpreter left. And said she would be back. So we
7	waited and waited. And I had gone out for lunch, but
8	then the interpreter never showed back up, and four,
9	five hours passed and passed, and I thought, gosh,
L 0	there should be interpreters here. Why aren't
L1	interpreters showing up? So we waited and waited, and
L2	it didn't seem right.
L3	So then the next day, again, we had the same
L 4	problem that no interpreter showed up, so I have been
L5	praying. After a while we went home, and later, I had
L 6	called and they had an interpreter that came in briefly
L 7	and that was it.
L 8	So thank you.
L 9	DIRECTOR WESAW: Looking for Tami Glenn.
20	Okay Brett Hollerback, Millie Hurson, Mary Trayner, and
21	Hanni Adams. Those are the next four up. Brett
22	Hollerback.
23	BRETT HOLLERBACK (Through interpreter): My
24	name is Brett P. Hollerback, H-o-l-l-e-r-b-a-c-k. I
25	graduated from MSD in '99. Didn't use interpreters

1	much. But I went to dentist like every six months,
2	used an interpreter. I was able to write back and
3	forth. Thank you.
4	MILLIE HURSIN (Through interpreter): Hello.
5	My name is Millie Hursin, M-i-l-l-i-e, H-u-r-s-i-n.
6	I had a bad experience in the medical
7	situation with my mother. I am not going to go into
8	that story. I already wrote the comments and sent it
9	to Lansing. It is posted on the Web.
10	But I just want to talk about specifically
11	the EIPA certification. I am signing to you, but I
12	want to speak straight to him, so I am going to ask
13	Jeff if he doesn't mind telling the sign.
14	I am an educator, over 30 years experience,
15	retired teacher and school administrator. We know the
16	State of Michigan and MBA requires teachers to have
17	higher certification. They must be highly qualified.
18	If they are not, they can't teach. We also know that
19	if teachers want to teach math, they must have an
20	endorsement to teach math. If they want to teach
21	chemistry, they must have an endorsement to teach
22	chemistry.
23	Our interpreters, on the other hand, they
24	want not to have these requirements. They want to have
25	an EIPA of 3.5. They want to have time to learn to

1	improve their skills. They want to have time to go
2	from 3.5 to a 4.0. They want time for that.
3	We don't give teachers time to get their
4	endorsement. If they don't get their endorsement, they
5	are out the door. These interpreters, they want to go
6	from a 3.5 to 4.0 over a couple years. At whose
7	expense? At our children's expense.
8	I am from Wayne County. And I know that
9	Wayne County, like all other counties in Michigan, has
10	a very low mentality. The students in Detroit, the
11	students in Dearborn, students throughout the state are
12	not given the first option to come from Michigan School
13	For the Deaf. They must rely on those interpreters who
14	do not have the skills that they need.
15	Whether we do like California does, whether
16	we do like Texas does, we can do an IEP meeting, the
17	parents' first choice is the deaf school. When that
18	choice is made, the next choice is interpreting.
19	In Michigan, we are doing it half ass
20	backwards. They don't have the choice to come to MSD.
21	Many parents are fighting to come to MSD. I think it
22	is time to pass these laws. We are not here to please
23	the interpreters. We are here for our students.
24	4.0; nothing less.

Thank you.

1	(Applause).
2	REBECCA SHRINER (Through interpreter):
3	Hello, my name is Rebecca Shriner, S-h-r-i-n-e-r.
4	I want to talk about the interpreter program.
5	And what that person had just said, I agree with and
6	support that.
7	Many children who are in mainstream schools,
8	the mainstream teachers tend to write on the board.
9	And the interpreters are what are they supposed to
10	look at? At the interpreter or the writing on the
11	board? So the kids always tend to lose one or the
12	other, you know, it becomes that much harder. So there
13	may be 20 percent given an education, where if you send
14	them to deaf school, where they have the deaf teacher
15	to educate those children, the children are going to be
16	able to pick up much more quickly and advance faster.
17	And so that's my goal. I would like to see
18	kids who have a teacher who is deaf or they have a good
19	education level.
20	As far as VRI, I had some experience with
21	that with my daughter who was brought into the
22	hospital. She was in the Children's Hospital, and they
23	brought in VRI. And the doctor had not arrived yet so
24	the VRI was not on. After two minutes, it shuts down
25	and they have to reset it again. So then another nurse

1	comes in and has to set it back up again. And they
2	struggle 15 minutes, and the doctor is grouchy about
3	it. It is not fair. Why don't we just get a live
4	interpreter. And it is all right for interpreter. It
5	is not the hearing person's right. So please support
6	this to have a live interpreter. And the education of
7	our children easier.

8 HANNI ADAMS (Through interpreter): Hello,
9 everyone. My name is Hanni, H-a-n-n-i, Adams,
10 A-d-a-m-s.

2.1

Let's talk about court. I asked my lawyer would an interpreter be there? He said yes, there would be. I told them I wanted an interpreter from another agency, or I did not use the other agency, I wanted to use these two interpreters because of skills of the other one, you know, they don't really know a lot of interpreters in the agencies that are out there, so I called and somehow an error was made.

I got to court. Got to the courthouse, and my stomach immediately went to knots because I knew that person and they were an awful interpreter. Had very basic skills. Their expression, body language, they sound like an animal really is what they look like. But anyway, it was a last minute. I am about to go in the courtroom. Oh, I was very embarrassed with,

Page 47 you know, la, la, la (indicating) like this with their 1 2 face, and it was very embarrassing. 3 I got through it, it took about ten minutes. I got out of there. I was very embarrassed because, 4 you know, I just thought, man, I was upset with my 5 lawyer, really, when I left, you know, there was no way 6 7 for her to go home, the lawyer had to take her home. The interpreter could not get home by themselves. The 8 9 lawyer had to take them home. 10 After that, I got a bill. And I thought, \$400, to that agency. I thought, that's not my 11 12 responsibility. 13 So I thought it was this third agency. I 14 went to the senior citizen community place, found the 15 interpreter that was there in court, and I said, hey, who sent you? And where did this bill come from? 16 17 Well, I found that it wasn't the agency I thought it 18 was, it was a foreign language agency. And I said, 19 well, guess what, not paying it, there you go. You 20 take the bill. And you go pay it for me. That's it. 2.1 Never got another bill. 22 Thank you. 23 DIRECTOR WESAW: Is there a Mary Trayner? The next five -- well, I was wondering if it 24

was Mary, the sign said Mary so I wanted to make sure

1	we weren't missing anybody.
2	After Mary speaks we have Chasity Coryell,
3	Christine Kotda, Frieda Morrison, Tracy Sharpe, and
4	Theresa Mack.
5	MARY TRAYNER: I am Mary Trayner. I had VRI
6	(Speaking into microphone but could not be heard).
7	(Through interpreter): The problem that I
8	was having with VRI, it took 20 minutes to get it set
9	up. And finally after it got set up, blurry. The
10	doctor came in, and I told him, I said, I can't see,
11	it's blurry. You know, and he heard me talk, so he
12	shut it off, figured he could communicate with me by
13	talking. But I said my husband doesn't understand me,
14	he doesn't read lips like I do, you know, I am not
15	going to talk to you, I don't understand you. He was
16	stubborn. He went ahead and kept talking to me. Some
17	things I didn't understand. I had questions, and he
18	made faces and not give me an explanation. Some of
19	things he said, I missed.
20	He wanted to read the test results, and he
21	told the nurse, hurry up, set up the VRI again, and
22	they got it back on. He said, well, the doctor is not
23	here. We are going to have to wait a few minutes, and

the VRI said three minutes, we have to take it off.

You can't turn it off, the doctor is right out there

24

1	reading the results. Said sorry, three minutes.
2	So then my husband is arguing, hey, I have
3	the right. It is not my fault, he had to read results
4	first. You need to not turn it on. Turn it on, turn
5	it off. The nurse finally told my husband, he was
6	arguing, trying to explain about VRI, keep it on until
7	the doctor came back. So they are arguing back and
8	forth for three minutes. It is not right. You are not
9	helping.
10	Finally the doctor came back. Luckily it was
11	still on and we were able to get the explanation, but
12	what a pain in the ass.
13	I need a real live interpreter, I am more
14	comfortable, less stress. A lot easier for mentally to
15	explain and talk back and forth, look at than to look
16	at a TV. Much easier to do it through a person.
17	I hope I explained that clear. Kind of hard
18	for me to talk silently.
19	Thank you for listening.
20	CHASITY CORYELL (Through interpreter): Can I
21	go ahead? My name is Chasity, C-h-a-s-i-t-y. Last
22	name C-o-r-y-e-l-l.
23	DeafBlind. I moved here from North Carolina.
24	And when I got to Michigan, I thought one great thing
25	that was here is Mackinac Bridge. Thought that was

1	wonderful, connecting Upper and Lower Peninsulas. I
2	thought that was great. Who's biggest Mackinac Bridge
3	admirer? That's all I wanted to say. Pay attention.
4	Anyways, I thought the inventor was great in
5	Michigan, and I talk about some Mackinac Bridge, Big

7 that was great.

2.1

But when I think about who is the Big Mac
Bridge in my life, who is it? It is my husband. You
know. You know, compared to him, the bridge is
nothing. So my kids are not the bridge of my life.
They are here. So where is my -- where is the bridge
in my life? It is the interpreter.

Mac Bridge go right from Lower Peninsula. I thought

Anyways, I support the interpreter law, and I want the rules to be stricter. I don't care what the interpreters think. I am thinking about me being able to have effective communication, DeafBlind, hard of hearing effective communication. I think that's the most important.

And everyone should be nationally certified. I want all, all to take the BEI. And I know there's some national interpreters are nationally certified CI/CT, have been grandfathered in, but I look at that and I don't think that's right. I think, you know, when I go to the doctors, when I go to school, I need

	Page 51
1	to remember, I am a mother, two children, I am out to
2	the doctor a lot, I go to the dentist, I go to work, I
3	go to school. And there is few nationally certified
4	interpreters.
5	What about the ER? They can't understand me.
6	They need to take it again. They are always asking me
7	to repeat over and over again. You know, then my
8	husband asks for an interpreter. It is an issue.
9	EIB, they are not required to take that test
10	every so many years. That's a complaint I have.
11	Testing needs to be ongoing. They need to have that
12	certification.
13	And I also want the hospitals, medical
14	community, doctors, should not be able to force my
15	husband or family members to interpret, forcing us to
16	use VRI.
17	Those are the three amendments I support in
18	the rules and regs. And please, I need the Big Mac
19	Bridge.
20	CHRISTINE KOTDA (Through interpreter): I am
21	not sure I am spelling my last name correctly, but
22	Christina, excuse me, Christine, K-e-t-o-l-a.
23	It is nice to see you this morning. Anyways,
24	I have gone as a foster parent for many deaf children
25	for since 1991 to 2006 '71, excuse me, to 2006.

1	Have	children	with	emotional	behaviors	and	other
2.	issue	es.					

2.1

And I often struggled, for example, with the police. You know, there is too many. Something happens, they call the police, 12 police show up. And one interpreter. You know, makes me angry. Makes me angry. Kind of makes me blow my top. You know, one interpreter, we have got police all over the place shouting orders, running around.

I struggle with one interpreter who is working for two, three, four hours, you know, and they should not do that. That's illegal. They should have another interpreter to switch off with to keep things running and keep things going until the police take care of things, because they are responsible for doing that, so they bring one interpreter. It is just, you know, they are saying this and that, moving this person over here and moving that person over there, and it is like, well, you know, wait a minute, they are telling me to wait a minute, doing this, doing that, I, you know, I get upset, really pissed off quite regularly, to be honest, because of children, you know, going through that, you know, love those children and the foster program, that's an issue.

Also, the hospital. I hurt my knee, it was

1	an awful, awful pain. I get there, and, you
2	know, I want a live interpreter. They bring I said,
3	well, wait a minute, and they wheel the cart in, this
4	TV, and I am like, what is that? Well, just wait a
5	minute. All these people coming up to me and telling
6	me this, that and the other, further infuriating me.
7	And then struggling with TV, focusing on that and not
8	worried about my health, you know. I need medicine, I
9	need a shot, I need pain, I need something to relax,
10	and they are all over there yanking around with the
11	computer and trying to get it going. Hang on, wait
12	just a minute, and here I sit. I am in pain. I hurt.
13	I need some attention. Well, hang on a second, this is
14	important. You know.

I said, see you later, my husband took me home. We went to another hospital. I am tired of it, I am tired of VRI. You know what? If I had a heard attack, would they be fixing the machine while I am having a heart attack? What about the person who is more important? Why would I be a box? It is all right. I want to make sure that there is a live interpreter all the way until I am in the ER; not the box and VRI.

DIRECTOR WESAW: Okay. We have Frieda

Morrison, Tracy Sharpe, and Theresa Mack. And as soon

Page 54 as these folks are done we will take a five-minute 1 2 break for the interpreters. So Frieda is up. Tracy. And then Theresa. 3 FRIEDA MORRISON (Through interpreter): 4 Hello. I am Frieda Morrison, M-o-r-r-i-s-o-n. 5 Before I get started, I am really happy to 6 see everybody here. I hope we keep this type of 7 activity going beyond today. 8 9 But I have a lot of the same comments as many 10 of you. I am going to talk about the EIPA. A few days ago, I watched some of the posts. 11 I also posted some comments. 12 13 I am a mother of deaf children. I am a fourth generation member of a deaf family. I have been 14 15 to the schools, you know, we have had some of our kids, 16 grandkids at MSD. 17 You know, back in my time, it was a mainstream situation. I have three sons, all deaf. 18 19 did not send them to the School For the Deaf. 20 them to public school, and then I found out that this 2.1 school really -- school definitely had the best education, balance, life, so I sent them here. 22 23 But I still work in the mainstream setting. 24 And I saw how the interpreters interact with the

students, and I have seen things, I have been through

2.1

things, an oral progr	am, been thro	ugh self	-contained
classroom situations.	Mainstream,	with no	interpreter
at that time back the	n.		

Page 55

I came here to the school for high school,
Michigan School For the Deaf, and was able to have
those experiences in my last years, plus see my kids go
to mainstream school, then coming here to the School
For the Deaf.

I became -- I am employed here at School For the Deaf. I have watched kids come in from other schools all over. And I have seen what's happened. I have seen how they are inspired when they come here.

That 4.0 does not need to be lower; it needs to stay. Those kids have already lost education. They have already had so much loss. And those school administrators and those interpreters that are trying to convince them to write these letters and send them in, I mean, clearly it is because of the interpreters because they didn't, you know, we are not going to be here, I wouldn't have my certification, so they all freak out and get scared. And it is really a false fear and it is dirty. It is dirty business. Those school administrators, if they would have said, hey, in our school, you know, we are going to handle our interpreters, make sure they are — handle the

	Page 56
1	certification, control that. No. How does the school
2	administrator, with absolutely zero deaf education
3	experience, no signing ability, judge that? No. Let
4	DODHH take care of processes of certification and have
5	those children get the kind of education, stay here.
6	Education is vital.
7	Thank you. Please listen.
8	TRACY SHARPE: (Through interpreter): Okay.
9	My name is Tracy Sharpe, S-h-a-r-p-e.
10	And I want to thank all of you at DODHH. You
11	certified interpreters, I want to thank you. And I
12	would also like to thank AT&T and Henry Ford Hospital
13	in Detroit. Awesome. Every time I have been into the
14	hospital when I have been sick or something has been
15	up, it has been automatic that an interpreter shows up,
16	and no question. And they question you, well, what do
17	you need? It is just impressive. So I want to thank
18	you for that. And best of all, Henry Ford interpreters
19	show their certification on arrival. And that shows
20	respect. That is pleasing.
21	I want to talk about education in mainstream
22	schools. I have a friend who is 15 years old. And I
23	was shocked. This friend went to school with an
24	interpreter. And the interpreter was up at the front

signing. And that student was watching the interpreter

	Page 57
1	and did not understand the interpreter. The problem is
2	that interpreter was not a very skilled interpreter.
3	So I asked that 15-year-old, is the interpreter
4	certified? What's their certification? Do they have
5	VRI learning? So I went in and I decided to ask. They
6	had nothing. Not just a BEI I, but we didn't know
7	any further as far as what the name of this interpreter
8	was.
9	So the person had come in, they had a note
10	taker that was coming in, and they were taking notes at
11	IEP for the deaf student. And the note taker had deaf
12	parents so they knew about taking notes, and that
13	student said that.
14	I don't even understand at all. My
15	grandparents are deaf, and I am used to using sign
16	language, everybody in my family signs, and that note
17	taker took care of that student for almost two years.
18	But the problem is, is that that student was
19	also only 15 years old. They shouldn't be interpreting
20	notes for another 15-year-old. They are teens. So
21	they shouldn't be interpreting and taking notes for
22	this other student.
23	So please, I am asking you to focus in on our
24	education and force the mainstream programs, force

these interpreters to get certified, all of them. And

	Page 58
1	most of all, don't accept 3.5 or whatever certification
2	in EIPA.
3	So that's all I want to say. Keep the EI.
4	THERESA MACK (Through interpreter): Hi. My
5	name is Theresa Mack.
6	I am going to school right now to become an
7	interpreter. I marked the box on the paper not to
8	speak because I am very nervous. But this right here
9	makes me want to become an interpreter, more a
10	qualified interpreter so I can speak for deaf people
11	everywhere in hospitals, wherever they need a qualified
12	interpreter.
13	Thank you.
14	DIRECTOR WESAW: Okay, folks, it is 10:56.
15	We are going to take about a five-minute interpreter
16	stretch break. Kind of stay in place if you would. We
17	are really running great on time. I think if we can
18	keep this to five minutes, or until they signal they
19	are ready, we should be able to get everyone who has
20	signed a card the opportunity to speak.
21	So at this point before the court reporter
22	stops, we will come back at 11:01.
23	(Off the record at about 10:57 a.m.)
24	(On the record at about 11:08 a.m.)

DIRECTOR WESAW: Okay. Folks. Going to

1	start up again.
2	As normal, five to ten, but that's good. Got
3	a nice little break, in our Indian time when people are
4	related. Okay.
5	It is now approximately 11:08. We will
6	resume this hearing where we left off. The next
7	persons who indicated desired time on proposed rules
8	will be on for the next five: Theresa Miracle, Judy
9	Knights, Joseph Crews, Diana Campbell, and Laura
10	LaBudd.
11	And before Theresa comes up, before Theresa
12	speaks, I just want to thank you folks for staying
13	within the guidelines that we proposed. Everybody has
14	done very well, and as a result of that, based on the
15	numbers that we have that have requested to comment, we
16	should be able to get everybody on the record by 12:00.
17	Or we will go as late at 12:15 because we started at
18	9:15, actually 9:20, but again, we have to be out of
19	here by 12:30.
20	With that, Theresa.
21	THERESA MIRACLE (Through interpreter):
22	Hello. My name is Theresa Miracle, T-h-e-r-e-s-a, and
23	I just want to make sure, it is not a T-e, T-h, thank
24	you, M-i-r-a-c-l-e.

So I wanted to explain, I come from a long

1	line of deaf in my family. I am the sixth generation.
2	And I have deaf children, and they are the seventh
3	generation. And I have seen the changes. Way back
4	when there were no interpreters at all, I remember my
5	parents not having an interpreter. And the
6	interpreters that we did have were the hearing children
7	of deaf parents. We are called CODAs. They were
8	always the interpreters. They were very respectful.
9	Now we have interpreters, and that's been fine. But I
10	have been learning as we go, and there's been some
11	changes, as far as accessibility, but we are still not
12	finished. There is still more to go.
13	My parents are deaf. And my father had a
14	health problem. He has complications of diabetes. He
15	has CHF, congestive heart failure. It was very
16	complicated. And my dad did not understand the
17	interpreters that were used. He didn't understand his
18	diet and how he was supposed to improve his health.
19	And he ended up passing away because of it. I lost my
20	the father, too young. It was fall. But then we have
21	to move on, right, we all have to move on.
22	And just recently, my mother was taken into
23	the hospital for emergency surgery. She was in
24	terrible pain. So they had given her some pain
25	medication and they brought in a VRI interpreter.

	rage of
1	Fortunately, my daughter, who is a CODA, she was in
2	there working with her, and my mom had said, hey, I am
3	pretty woozy. And they found out the interpreter had
4	said, oh, she wants more pain medication. And that was
5	not what she said. It was horrible. So that meant
6	that they were going to give her more pain medication.
7	My daughter had to stop her and say, that's not what
8	she said. She said she was woozy. There were so many
9	complications.
10	My mother and daughter can't communicate with
11	the VRI interpreter. That's not fair. How many people
12	are going to have to die before we make a change? So
13	we need to pass this. We need to have accessibility.
14	And what about the children? What about me?
15	What about them? Are we going to be underestimated and
16	insignificant citizens? So we need this to pass. This
17	is not a joke.
18	Thank you.
19	JUDY KNIGHTS (Through interpreter): My name
20	is Judy, last name is K-n-i-g-h-t-s. I am from
21	Saginaw.
22	My husband Bill, many years ago, was quite
23	ill, had to go to the doctor, found an interpreter. My
24	son happened to be home from the army and went with
25	him, and we went discussing things with the doctor. He

1	was having some severe kidney problems; wasn't sure if
2	he was going to need dialysis. There was no
3	interpreter there.

2.1

You know, we thought maybe he would go to Detroit, get better medical care. Again, there was no interpreter there. He had to write back and forth. My son had to do quasi-interpreter for him. We went ahead and had surgery and had an interpreter who could sign somewhat, after the surgery, but he came home, back to Saginaw, never had an interpreter, doctor there.

He got sick again, took him to the emergency.

And they said, you have got to go to Detroit. He is

like, you know, his son gave him a kidney, and it

seemed to be working fine, but there was some type of

problem. He had to be sedated. No interpreter,

24 hours, and was having all these complications.

Couldn't write back and forth, couldn't communicate,

just kept going all the time, every week because of the

surgery, he had to go, with no interpreter.

And then, you know, he finally woke up, he was able to tell him who the president was and all that good stuff. And they said because of the severity, we are going to have to give you -- put you out again.

And then he developed an ulcer. He was laying there, doctors all around, all these, you know,

	Page 63
1	tubes and things, he couldn't communicate. He lost a
2	lot of weight, really got thin.
3	After that he started to improve, get his
4	strength back. He was weak. He kept getting doctors'
5	appointments with interpreters. Some doctors accepted
6	interpreters; some didn't. The one doctor with
7	dialysis, he did. The other doctor, he didn't.
8	So I mean that was it. I mean, we need to
9	get interpreters.
10	DIRECTOR WESAW: Joseph? Joseph Crews? Who
11	was that Joseph? Diana Campbell, Joseph Crews, Diane
12	Campbell, and then Laura, we just need Diana.
13	JOSEPH CREWS (Through interpreter): Hi. My
14	name is Joseph Crews.
15	And the reason why I am here is because I
16	wanted to talk about the problems of VRI.
17	First of all, I was born deaf, totally deaf,
18	and grew up that way.
19	An interpreter has saved my life. For
20	25 years, I have had HIV, so I have gone in and I have
21	talked about my health needs.
22	Just recently, I went in in the fall, and I
23	was in the hospital, and there was some changes, there
24	were some changes to the law, and they didn't allow the
25	interpreter anymore. They had this VRI. I wasn't able

	Page 64
1	to understand the VRI. It was not effective at all.
2	It wasn't here, so it wasn't able to meet their needs.
3	So I said I wanted to have an interpreter and they
4	refused.
5	So a couple of hours later, again I had asked
6	for an interpreter, and they refused, it was a big
7	problem.
8	Also, I was having a lot of frustrations with
9	the interpreters, and I said I needed that equal
10	access, and I was also involved with Southeast Michigan
11	HIV and AIDS Commission, and I had become the first
12	deaf person that was in there. And the reason why I
13	was there is because I thought it was important for the
14	deaf community who can't speak out for their needs and
15	their health needs. And also I am involved with
16	women's breast cancer, diabetes and several others, so
17	complications of health issues.
18	So every time, you know, they go into the
19	hospital, there's ineffective communication. It is not
20	good enough to have a VRI. It is not clear. Can you
21	understand this tiny little interpreter on a screen?
22	Can that interpreter read my body language? I need to
23	have a live person there. And that helps me out a lot.
24	So I need your support, and also I need VRI

to be taken out and have a live interpreter for

1	accessibility.
2	Thank you.
3	DIANA CAMPBELL (Through interpreter): My
4	name is Diana Campbell, C-a-m-p-b-e-l-l. I live in
5	Oakland County.
6	And I have worked at a deaf program in
7	Oakland County for about 20 years. I agree with what
8	Millie Hursin said about the 4.0 for the EIPA. I agree
9	a hundred percent. I also respect all parents' wishes
10	to take their children to a deaf residential school, or
11	if they want to have their child in a deaf program. I
12	understand that. I understand and I respect it. And I
13	know that's the parents' wishes.
14	But currently I want to focus on where I have
15	worked for over 20 years, and that's in a DeafBlind
16	classroom and working with those students.
17	I want to talk about the teacher in the
18	education program, and I would also like to tell a
19	story.
20	There is one teacher who came in and they
21	were sharing something, and when I went to go interpret
22	with the DeafBlind student, they had said "bate." But
23	the word they used was "baking soda." And they signed
24	it like this, like in an oven. And I said, say that
25	again. Baking soda is not in an oven. It is a

	Page 66
1	finger-spelled term, it is baking soda. Tablespoon was
2	signed as a table and a spoon. And I said, no, you
3	need to finger spell tablespoon.
4	So I was working with one student who was
5	signing, you know, a dollar like this. And they would
6	sign 40, 50, and you could tell that they had it
7	automatic, it was ASL, it was in them. And the teacher
8	would come over and correct them and say, you need to
9	sign \$40 like this. And I said no, no, no. They know
10	it, they know how to sign 40, 50. They are great at
11	it. So I expect all teachers to certify.
12	(Applause).
13	They have nothing for these teachers or the
14	interpreters. I want that. We need that. Thank you.
15	(Applause).
16	DIRECTOR WESAW: Before Laura comes up, next
17	up is Jillian Gruetzner, Rose Bonacci, Katherine
18	Johnston, Olivia Roberts, and Charlie Christian.
19	LAURA LABUDD (Through interpreter): Hello.
20	My name is Laura Laude, L-a-u-d-e, excuse me,
21	L-a-B-u-d-d.
22	For the last two or three years, I have gone
23	in to see my eye doctor, and I have always had an
24	interpreter, for the last several years. However, on
25	the third year, when I had gone to see my eye doctor, I

1	was expecting an interpreter. And there was not one.
2	So I had gone into the office and I asked them where
3	was the interpreter, and they said, you don't need the
4	interpreter, we have a nurse here who signs.

2.1

Something didn't feel right. So I was called back and the nurse came back, and I went into the room, and the nurse knew some very basic slow signs. And they said she signed like this. I know sign. So we muddled through it. And they had asked my friend to interpret for me. So my friend was also trying to struggle through it, and it — it wasn't right. So I had said, I would prefer to have an interpreter. It is important because I am diabetic, and it is really important for my eyes that I need to know the health of my eyes.

So I would like to recommend that we have interpreters for people who have any health issues. We know it is important, our bodies and our health.

I have some other experiences, as well. I moved here from Minnesota. When I moved here, I had gone into several doctors and I had some appointments. I had gone into a room, and the doctor came in along with the interpreter. And after we had gotten — communication was over, the doctor left, and the interpreter stayed in the room. I think it is

1	respectful for the interpreter to also leave the room.
2	I think we need to respect people's preferences and
3	leave the person alone in the room. And then as the
4	doctor comes into the room, that the interpreter also
5	enter the room. I think it is respectful for the deaf
6	community.
7	I used to live in Minnesota. I lived there
8	for 20 years. And the interpreters were excellent.
9	They were top notch, highly certified interpreters.
10	And there are many interpreters that work in medical
11	situations and court situations, and a variety.
12	When I came here, I was baffled. So I really
13	want to encourage that we support and pass this bill
14	for higher certification.
15	Thank you.
16	JILLIAN GRUETZNER (Through interpreter): My
17	name is Jillian, J-i-l-l-i-a-n, G-r-u-e-t-z-n-e-r.
18	I am going to be heading back there.
19	I want to talk about interpreters in class
20	with students. You know, parents, you know, should
21	have the right. I don't think parents should have the
22	right to say that interpreters should not be in the
23	classroom. I support that. But I also think that the
24	student should have the right to say, I don't want that
25	interpreter in my classroom.

1	I have experienced that before when I was in
2	school in high school, the interpreter came in and, you
3	know, struggled through the interpreter, eat, you know,
4	and he was doing other things while they were in my
5	class. And I thought, wow, they need to not be in my
6	class. I don't I don't want to have an intern
7	student in the class while I am there learning. They
8	told me, too bad. Hey, it is my class, it is my
9	education. This is what I need. So I told my mom,
10	finally my mom was in school and we were able to remove
11	the student interpreter from the classroom. Because,
12	you know, I wanted to focus on my education.
13	And also I want the EIPA, PA 204 to be at 4.0
14	and higher. You know, if it is not, the interpreter
15	should not work in the schools. They should go get up
16	to speed, pass that test and then come back and meet

I have two other concerns that PA 204 really doesn't have right now that I would like to mention. Perhaps later, we will have to have another amendment down the road to add it. But interpreter agencies, there should be some -- a 4.0. You know, the interpreter agencies, where is those who control them? Where is the -- some of them, who is watching the agencies? Not just the interpreters? There's some

that standard.

2.1

	Page 70
1	dirty business going on with some of those agencies,
2	and those agencies should be regulated. There is a lot
3	of dirty business going on with agencies that is not
4	addressed.
5	And also talking about ethics, we really have
6	the EPC to follow, but really they should have the
7	ethics for standards, standard to interpreters, not
8	professional, need influence of deaf community and also
9	other interpreters that are doing the job, as well.
10	Thank you.
11	ROSE BONACCI (Through interpreter): Hello.
12	My name is Rose Bonacci, B-o-n-a-c-c-i.
13	I have many friends in the deaf community. I
14	am a CODA. I became a teacher of the deaf. I married
15	a deaf husband. I have a deaf husband. Two of my
16	three children are deaf. And just recently in the last
17	eight years, I became an interpreter of the deaf.
18	I have to say that being an interpreter is a
19	very difficult job. It is tense. You are on all the
20	time. You have to always go back and try to improve
21	your skills.
22	Being a parent, I understood what I needed
23	for my deaf children. Ninety percent of deaf children
24	are born to hearing parents. We don't have a lot of
25	hearing parents here today with deaf children because

	Page 71
1	they always listen to the schools. The schools are the
2	ones that give the advice to the parents. And so they
3	listen. So if the schools are saying, oh, we need to
4	keep these interpreters at a 3.5, the parents are going
5	to say, yeah, we need to keep the interpreters at 3.5.
6	Really we need to improve the quality of our
7	interpreters in the schools, so that our children can
8	grow in the education that they need so they can be
9	successful in their adult life, and need interpreters.
10	They know it as effective communication.
11	As an interpreter, I ask deaf clients, do you
12	understand me? If they say, yes, they say, no, would
13	you like me to get another interpreter? That's okay.
14	It doesn't mean I am a lousy interpreter. It means I
15	am not an effective communicator for them.
16	And so many of our deaf people here today,
17	you know, are upset about not having effective
18	communication with interpreters. And they really need
19	to stand up and say, you are not interpreting
20	effectively for me, which also goes back to the
21	agencies. I think that's one thing that does need to
22	be amended in the rules. Agencies, because we are the
23	interpreters, how do we know to get the jobs? They get
24	them through agencies.

I am an interpreter. I follow my code of

Page 72 1 ethics. I have been asked many times to go to court. 2 I am sorry, no, I am not going to court. I don't feel I have the skills. Yes, you can go, you can go, you 3 can go, you can do it. No, I am not going to court. I 4 5 made that decision because I am following the interpreters' codes of ethics. I will follow 6 7 professional code of ethics. That's what we need to do 8 as interpreters. 9 Agencies have to have some responsibility 10 There was nothing in here about the agencies. Agencies need to have consequences too. 11 12 Thank you. 13 KATHERINE JOHNSTON (Through interpreter): Hello. Eye contact is very important to me, so if you 14 15 wouldn't mind. Thank you. 16 My name is Katherine Johnston. People call 17 me Katie. 18 I am sorry, I like to remain in eye contact. 19 And to be perfectly honest with you, I am 20 familiar with many of you here and many of the interpreters in the room, and there are some of my 2.1 2.2 favorite interpreters here. Many of them are here. So 23 really, we are very fortunate you have the privilege to have full access communication right now. I don't see 24 25 them often. Very periodically.

1	As a deaf person and Michigan citizen, I
2	always get low quality interpreters. It is
3	aggravating. And you are really lucky right now
4	because it is as natural to you as breathing. You
5	don't have to think about how to breathe. And that's
6	how sign language is for these top notch interpreters,
7	and then they can focus on my issues.
8	Excuse me. Hold on. Thank you.
9	And I see a lot of people that need to focus
10	on that, but this interpreter issue is not something
11	that you can just not focus on, and not focus on our
12	issues. You don't have the interpreter issues. We
13	have got some great interpreters sitting here. Thank
14	you. Thank you, good interpreters over here, and
15	there's many of them around here, top notch
16	interpreters. It is like music to your ears when we
17	have a top notch interpreter. It is music to my eyes.
18	And then we can focus on the other issues.
19	So please support PA 204. It is not too late
20	to make a change. Okay. We will forgive you if you
21	need to make changes.
22	Thank you. Please.
23	DIRECTOR WESAW: Okay. Next up is Shari
24	Smith. Olivia Roberts, I announced her name, but she

has written comments. She didn't wish to speak, so we

	Page 74
1	will have them read. And then after that is Rhoda
2	Nichols, Jackie McMall, and Tim Johnston.
3	SHARI SMITH (Through interpreter): S-h-a-r-i
4	Smith, and hello. Love you. Hello.
5	Mr. Wesaw, he is not paying attention.
6	That's the problem. I am here as you are. You need me
7	to give my name again? I already gave my name.
8	And there is one issue that people haven't
9	commented on is mental health. A big problem with
10	interpreters. I have worked 33 years in Oakland County
11	and Wayne County, and in the mental health arena. And
12	it has been very frustrating. VRI should not be
13	involved in a mental health situation. There is a
14	television that you are working with. They think
15	television they may get confused by it. We have to
16	have a live interpreter in the mental health setting.
17	There is emotions that are involved. There may be
18	DeafBlind situations that are in involved. We need to
19	have live interpreters in mental health situations at
20	all times. They may think the TV is like at home and
21	get confusion. And if we have someone that's
22	DeafBlind, of course they need to have live
23	interpreters.
24	At Henry Ford, they have been awesome,

hundred percent. Just like Oakland hospitals. But

1	some don't have that. So we need to have a live
2	interpreter for mental health.
3	(Applause).
4	Okay? Love you all.
5	Secondly, EIPA 4.0. We need it.
6	Okay. Thank you.
7	(Applause).
8	OLIVIA ROBERTS (Through interpreter): Hello.
9	And I am going to be signing. My name is Olivia
10	Roberts, R-o-b-e-r-t-s. And I am in support of deaf
11	rights. I used to be in mainstream school. I can
12	speak. I am experienced in it.
13	First of all, I want to thank the Director of
14	DODHH, and the committee for the PA 204. Hallelujah.
15	We need to pass this. We can worry about the
16	amendments later.
17	The interpreters need to stop complaining.
18	They need to follow the standards for all interpreter
19	rules. We have suffered for a long time.
20	And in my time, we didn't have interpreters,
21	it was awful. The mainstream school, we had to just
22	barely get by.
23	And now we have children who have
24	opportunities to have qualified interpreters, and
25	that's their right, and that's their right for a good

	Page 76
1	education. And it is their right to have a quality
2	future.
3	It is not right for hearing people to tell us
4	how we should learn and how we should live. That's
5	wrong.
6	Deaf people know what we need. And we want
7	to be successful like everyone else. We didn't ask to
8	be born different. And we are not different where we
9	can't live at the same standard as hearing people. So
10	we have the right to be heard, and we don't want to be
11	swept under the rug like we are insignificant.
12	So give us our needs, give the children their
13	needs, and give us the right type of interpreters. The
14	interpreters need to be at a high standard. This is
15	not a get-rich-quick scheme. This is a professional,
16	just like lawyers and nurses and doctors. It should be
17	the same standards and they should follow the same
18	standards.
19	So please pass PA 204, period.
20	RHODA NICHOLS (Through interpreter): Hello.
21	My name is Rhonda Rhoda. The last name is Nichols,
22	N-i-c-h-o-l-s.
23	I worked at Detroit Day School, and Detroit
24	teenagers, and the youth center school for a
25	year-and-a-half. I have been very frustrated because I

1	worked in the cafeteria, and they haven't had any
2	interpreters there. And it is not fair. So I called
3	the principal and I told him I needed an interpreter.
4	So they called in the classroom teacher to come in and
5	sit and interpret for about 15 minutes. And it wasn't
6	right. So I asked the DPS and said, I need to have an
7	interpreter brought in for the cafeteria. It is very
8	important for retirement, for health issues, for what
9	else? Health services, safety services, food services,
10	and personal issues. There is a disagreement with
11	staff, I need to have an interpreter. DPS refused to
12	allow me to have an interpreter at work. It is not
13	fair.
14	So I am in support of this Act.
15	Thank you very much.
16	JACKIE MCMALL (Through interpreter): Hi,
17	everyone. My name is Jackie, J-a-c-k-i-e, last name
18	M-c-M-a-l-1, McMall.
19	Thank you. I have had so many experiences,
20	you know, when I was young in high school, I took all
21	regular education classes. That school had a deaf
22	program. They had interpreters. But unfortunately, in
23	my day, there really wasn't anything we could do, you
24	know. I am concerned about the future of deaf
25	children. And who you know, deaf children that are

1	going to take regular classes, it is their right to
2	have an interpreter. Back in my time, the
3	interpreter I couldn't use that interpreter because
4	I was in regular ed and those regular ed classes. I
5	couldn't believe it. I went through all that with no
6	interpreter for three years of high school.
7	I asked the teacher, note taking, what do you
8	plan to teach? What is the homework going to be?
9	What's the test going to be? You know, and I had about
10	five good friends that were willing to take notes for
11	me, to write stuff down for me, but couldn't interpret.
12	I suffered through that for three years, and
13	I made it. I made it with top honors. I was able to
14	graduate.
15	But what I think about, other deaf students
16	who are in regular ed classes, they have the right to
17	have an interpreter.
18	And yes, I would like the EIPA to meet the
19	4.0 standard or above. I think that's great. They
20	have that right.
21	Secondly, four years ago, I had to go to the
22	hospital. I had a life-threatening situation befall
23	me. I had to go through an MRI. They showed me, you
24	know, this list, take your hearing aids off, take your

25

bra off, take this off. Do you have any partial teeth,

1	take off, whatever, I did all that.
2	And then they told me and I expected them to
3	bring in, you know, the VRI. That's what I expected.
4	Well, they didn't bring the VRI. And I said, well,
5	where is VRI? You know, VRI for me right now will be
6	fine before, you know, I go get in a machine in the
7	MRI. They said, no, can't, we can't bring the
8	computer. I said, look, I understand you can't bring
9	it in while I am getting the MRI, but you can explain
10	to me through VRI what's happening before I go in
11	there. And I want to know everything.
12	Well, so I had to put my hearing aids back
13	on, converse back and forth, make sure I understood
14	everything, take my hearing aids off, go get in the MRI
15	machine.
16	The patient has rights, as well. And the
17	patient has a right to have VRI or an interpreter
18	before they go get in a metal machine. They need to
19	know what they are supposed to do. That needs to be
20	there.
21	Thank you very much for listening to my
22	comments.
23	DIRECTOR WESAW: After the next speaker, we
24	have Joe Williams, John Gleason, Judy Buffey, and
25	Gwendolyn Thorpe.

	Page 80
1	TIM JOHNSTON (Through interpreter): Hi,
2	everyone. My name is Tim Johnston, J-o-h-n-s-t-o-n.
3	I appreciate everyone who is sharing their
4	concerns. I also support the passage of PA 204, having
5	full access. I support qualified, certified
6	interpreters, because that's what deaf people need. If
7	you listen to all the comments today, you have heard
8	that.
9	I come from a deaf family, as well. I had my
10	first interpreter when I was in seventh grade, and I
11	was lucky. I have always had interpreters most of the
12	time, you know, but I know the difference between a
13	good interpreter and a bad interpreter. Some people
14	don't know the difference, and I feel bad for them.
15	You know, certified, qualified interpreters,
16	EIPA 4.0, please keep that standard. I know an
17	interpreter that graduated from Michigan here without a
18	4, worked in a mainstream school. They have to have a
19	4.2 in Florida. They have to have a 4.2. So deaf
20	people are lucky they live there. Here in Michigan, we
21	need more good, qualified certified interpreters.
22	And to be honest with you, I went to
23	Rochester Institute of Technology. I majored in
24	computer engineering. Always had to have, you know,

the best interpreters for that class, and I did.

1	But there was a class that was called an
2	assembly language class, a program language class. And
3	the interpreter was really fast and, you know, I went
4	through the teacher, hey, could you slow down a little
5	bit because it is really hard for the interpreter. And
6	that interpreter volunteered to speak for another
7	interpreter who would be more effective working with
8	that teacher. They brought in that other one, wow, big
9	difference. You know, so it depends on the
10	interpreter's skill, it depends on their certification.
11	They need to be honest with themselves, and I
12	appreciated that interpreter being honest with
13	themselves. The rest of you certified interpreters
14	need to be honest. Don't think about, this is my
15	livelihood. Deaf education is vital. Please. You
16	know, I was lucky to have the opportunity to experience
17	that interpreter being honest, removing them self from
18	the situation. I passed that class.
19	I have a minute left. The other issue I
20	wanted to talk about is VRI. I have experienced that
21	twice. I was lucky that it went okay. I had positive
22	experiences. I think the technology is wonderful. You
23	know, but it is they are lucky to have VRI in an
24	emergency situation, but that option needs to be there.
25	We should not force VRI. Deaf people know what they

1	need. Older deaf people may not have experience. They
2	should have the option not to be forced to use VRI.
3	I had it in the emergency room, it went okay.
4	The second time it happened in the Social Security
5	Administration, it worked great. I mean, nowadays,
6	boom, it was there, it was nice. But please do not
7	force deaf people to use it.
8	And then last, I want to praise Henry Ford
9	for supporting equal access for the deaf. I have
10	experienced a little bit of that. I had some surgery
11	back in '92. The interpreter was not certified. I had
12	surgery the next day, they got me a certified
13	interpreter.
14	Thank you. Time went fast.
15	JOE WILLIAMS (Through interpreter): Hello,
16	everybody. My name is Joe. My last name is Williams,
17	W-i-l-l-i-a-m-s.
18	I really planned on coming to the building.
19	I used to work here at MSD.
20	And now I work in Detroit Public Schools. It
21	is a sad situation, there in Detroit, that there is not
22	access. And the main problem is, it is not the
23	interpreters themselves, but it is the teachers. The
24	teachers aren't qualified to teach. And I say and,
25	you know, they may have a certificate or something, but

1	when you put an oral teacher in there with a student
2	who is fluent in sign language, they are not qualified
3	to teach them. My student is 16 years old, doesn't
4	know how to spell his name, doesn't know family
5	members' names. There is a lot of things he cannot
6	communicate. Something is wrong with that.
7	And secondly, I am sick of seeing
8	interpreters going on and on about, my
9	certification is this, my certification is that. Who
10	fucking cares? We don't care. It is not about you.
11	It is about the deaf client and what they need.
12	So, I support PA 204. You know, it is our
13	life, that are so important for us, it is for us, it is
14	not about you, interpreter. Yay, yay, yay, you are an
15	interpreter. That's not what it is about. It is about
16	deaf people and what they need. And if you can't, you
17	know, successfully and effectively, you know,
18	communicate, then go. That's all.
19	(Applause).
20	JOHN GLEASON: Good afternoon. My honor and
21	distinct privilege to be back with you today.
22	First of all, I would like to say thank you
23	to the Director. Matt and I have been friends for
24	many, many years. I have full confidence in him. And

I hope you do, as well. I would like to thank the

1	Civil Rights Commission and the delegation for the
2	Michigan School For the Deaf, and also the State of
3	Michigan for finding this an important issue to talk
4	about.

2.1

2.2

I was the legislator who wrote the laws to offer certified interpreters across the state of Michigan. And obviously, my wife says this is just one more thing that I could have done better.

I am here today to offer my voice and my support and my full commitment that we can straighten this issue out. I find it quite interesting that if I wanted to have someone work on my automobile, that they must be certified. If I wanted to go to a public school, we demand that our teachers be certified. My youngest brother is a doctor. My oldest brother is an attorney. Neither one of them can go to work every day if they didn't acquire the expertise that was needed.

This is a basic task going on today. One of the best words ever written in the United States of America: That "We hold these truths to be self-evident, that all men are created equal." Let them say that we didn't need special considerations, that we didn't need different methods to make sure that we met equality.

So today, I am asking you, don't leave your

1	voice and your effort here at Michigan School For the
2	Deaf. Contact your legislators, contact your
3	legislators, make sure they find out, this is
4	important, that you find this important.

2.1

Legislation is seldom complete, seldom. This is just another step along the civil rights march. We know as a nation that we let those of ours be left behind. We know that only a few generations ago, that we allowed women to vote. All of our laws need more work. And you are here demonstrating today that this one does, as well. So let's put our full faith behind this.

I know, I know that Matt is the Director that you need. And when I look at the Board and the Panel that's been established for the Michigan Civil Rights Commission, I know that the right people are working on your behalf there, as well.

But whether you are with the Commission, or whether you are with the Division, or whether you are just a private citizen, whether you have full hearing, or if you have hard of hearing issues, or if you are deaf yourself, we need to work on this issue together.

And I apologize, I apologize. I wrote many pieces of legislation, and I just took for granted that we were going to treat people the way that they should

1	be treated and establish the rules after the law was
2	signed by the Governor.
3	So I want to thank you for all your
4	commitments. Let's get this passed. Let's make sure
5	Michiganders, 10 million Michiganders all have the same
6	rights.
7	(Applause).
8	Thank you very much. And God bless each and
9	every one of you.
10	JUDY BUFFEY (Through interpreter): Hello.
11	My name is Judy Buffey, B-u-f-f-e-y.
12	Some of you I have seen and I have noticed.
13	My parents are both deaf, and I am CODA. And I have
14	seen it over and over at doctors' offices, over and
15	over and over many, many times. I have got a list of
16	when I have grown up, my mom and dad would go in, and I
17	would have to interpret for them because they would
18	never bring in an interpreter. And now they have this
19	VRI. It is the same issue. My mom can't see in small
20	print because she is in her 70s and it is hard to see
21	and she is trying to figure out what this is. Or it is
22	on a tablet. This tiny little interpreter.
23	Same issue with my uncle staying over here.
24	I have taken him several times, independent, my mother
25	is so shy, and my uncle will go in, and at the end the

1	hospital will always ask me to come back in and
2	interpret for them, call me after I have dropped him
3	off and ask if I will come and interpret.
4	This is a simple thing. Keep a live person.
5	Don't use that stupid VRI.
6	GWENDOLYN THORPE (Through interpreter):
7	Thank you. Hello, everyone. I am Gwendolyn Thorpe,
8	G-w-e-n-d-o-l-y-n, $T-h-o-r-p-e$ .
9	I am not going to go into gross detail, but
10	first of all, I come from a deaf family. I have three
11	deaf brothers. And yes, we went through a lot of
12	stuff.
13	But anyways, I would like to say five years
14	ago, I had to go to my doctor, because I noticed that I
15	had a lump on the right side. So the doctor decided to
16	take a biopsy. Had an interpreter there. After that,
17	it was done. My next appointment, I had to go back and
18	see the doctor again. And the doctor said the
19	interpreters, they are kind of interpreting along, and
20	just are flitting around and doing all these theatrics,
21	and I am, you know, trying to watch them and, you know,
22	after that point it was over with. The interpreter
23	said, hey, you know, the doctor said that if, you
24	know if it bothers you again, that you need to go
25	again. If it doesn't bother you, then you don't have

1	to.	I said,	really?	They	said,	yeah.	Well,	that
2	bot h	ered me.						

3 I went back to the doctor. And the doctor said, where you been? I said, what are you talking 4 5 about? I told you to follow up. Whoa, whoa, whoa, whoa, whoa, whoa. That's not what the 6 7 interpreter said. The interpreter said, no, I never 8 said that. Oh, I was upset. You know, too late for me. I had to have it removed, because the interpreter 9 10 failed to double follow up. I was upset. But, hey, God has been with me, he has been taking care of me, 11 and things have been great. 12

13

22

23

24

25

me about VRI. I had not seen it. So I was curious. I thought I would test it myself. So what I saw — let me just tell you, the VRI is not good for deaf people.

Because of blurriness. The lack of clarity, the struggle, you know. We are standing over here waiting and pushing buttons and, you know, doctors getting mad, nurses getting mad, you know, trying to get this interpreter, struggle, struggle, struggle, and finally it don't work. It is a waste of my time. Sitting here waiting, waiting. Finally, they get it going. I sign, it is not clear. It should not be a job for me to try to communicate. It is not good for deaf people.

1	Last Monday, I went to the doctor because of
2	an issue I was having with my eye. The same day I
3	called, they said you need to come right now. I said,
4	well, I need an interpreter, but it was like too late.
5	Anyways, I went in, they got the VRI. There I sat,
6	there was the VRI. And when the doctor told me to go
7	back, lean back, I couldn't see the VRI. The
8	interpreter could not see me. They can't stick their
9	head out of a box and look over and see what I am
10	doing. To be honest, VRI, no, you know, it is about
11	us, and deaf people's rights. It is about our rights,
12	what we want. It is about our choice. You should not
13	have to, have to, you have to. No,
14	please. You hearing people need to respect how deaf
15	people feel and what they want and what their rights
16	are. You want us to be happy, then let us be happy.
17	Please.
18	Thank you so much.
19	DIRECTOR WESAW: I have a question for Dan.
20	Because we started at quarter after 9:00, can we go
21	until quarter after 12:00?
22	We can. Okay. We are in pretty good shape.
23	Then the next four speakers, Jodi Seres,
24	Melissa Healy, Cindy Healy, and Victor Battani. Next
25	four meanle

	Page 90
1	JODI SERES (Through interpreter): Hello. I
2	am Jodi Seres. I am deaf. I was raised deaf. Went to
3	a residential school out of state. I grew up as a
4	happy person.
5	When I got out to the world, I decided to
6	move here. I was working in a deaf program, mainstream
7	program, which is quite different from a residential
8	school. And I worked there for 18 years. And I had
9	seen that there was improvements that needed to happen,
10	particularly with interpreters. DeafBlind people were
11	hard someone who is hard of hearing.
12	So, you know, the person who was facilitating
13	communication for the DeafBlind, they were not familiar
14	with sign language. And their parents wanted them, the
15	student, to learn sign and to read, both. So the
16	interpreter came in and they were interpreting until
17	there was a deaf teacher that came into the classroom.
18	They were fluent in sign language, but the interpreter

Also, I work in the schools. I have been working for a while. And if I have a problem or an issue within my job and I need an interpreter, I don't want to use an interpreter that works for the school.

didn't have certification. Now that student was far

behind where they should have been. So that

interpreter needed to be certified, as well.

19

20

21

22

23

24

	Page 91
1	I want to hire an outside interpreter. They don't want
2	to do that. They want to use them. And this is my
3	life, this is private, this needs to be confidential.
4	That law needs to change.
5	We are never happy. If you want us to be
6	happy, then we need to address this issue with
7	interpreters. That would make us happy.
8	Thank you.
9	MELISSA HEALY: Hello, everybody. I want to
10	thank each and every one for being here today. It is
11	nice to see so many people that are so passionate about
12	us, and also the Commission.
13	I am a child of two deaf parents who I
14	absolutely love, and I love supporting them and being
15	there when they need, you know, when they need me to be
16	there.
17	But on the same page, I also feel as though
18	they need support when I can't be there, and that I
19	need to be a daughter.
20	And there is time and time again when we have
21	gone to medical appointments, hospital visits, and
22	things of that nature, and it has been expected that I
23	would interpret for them. When first of all, I am not
24	a certified interpret. I can sign, but I don't believe

25

that it is the doctor or the hospital's ability to

2.1

Page 92

valida <sup>-</sup>	te w	hether	or	not	Ι	am q	goi	ng	to	inter	rpret	or	not.
And I,	you	know,	sho	ould	be	ab.	le	to	do	that	for	then	n.

I feel as though as a daughter, it is my right to feel the emotions that I need to feel during medical emergencies. I was forced to be an interpreter for my father while he was having a stroke. And instead of being able to step away and be a daughter, I had to be an interpreter. And that was not fair for either of my parents to not have a qualified interpreter there. It wasn't right for me as a daughter not to be able to have my emotions during that time. The stroke was after our car accident. Well, my daughter was screaming, so I had to leave her at home because Genesys Hospital refused to get an interpreter for my father when he needed one.

And I am a trained social worker. And so I know -- I feel as though that I should be able to advocate for my parents effectively. And even in my education, I still had to fight and fight and fight. It was so hard.

So I feel bad for individuals who don't have such a support system. And their rights are not stood up for. And so I just feel as though this bill needs to be supported in order for the deaf individuals to get the treatment that they need, and for the family

1	members to be able to be a family member, and not
2	somebody that they expect me to be.
3	So thank you. My name is Melissa Healy,
4	H-e-a-l-y.
5	CINDY HEALY (Through interpreter): Hello.
6	My name is Cindy Healy.
7	And the reason why I am here is because I was
8	so happy to be part of the civil rights movement.
9	My husband was in a car accident about a year
10	ago, and he needed to have surgery. At the time, he
11	needed to be discharged, and so we were supposed to get
12	an interpreter at 8:00 in the morning to get ready for
13	discharge. We waited and waited and waited for an
14	interpreter who never even showed up.
15	So I went out and I asked the nurse, where is
16	our interpreter? And they said, oh, the interpreter is
17	here. But the interpreter is in with another deaf
18	client. Say what? Oh, she will be back, they said.
19	So I said, fine. And I waited. And we had three
20	doctors show up at that time without an interpreter.
21	So the interpreter who was downstairs with
22	another patient had to come back upstairs to work with
23	us. And I didn't like that. I felt like we needed to
24	have our own interpreter, and the other deaf patient

who was downstairs should have their own interpreter.

1	That way neither one of us is missing any information
2	from the doctor.
3	So I am hoping that we pass this law for each
4	patient to have their own interpreter.
5	Thank you very much.
6	VICTOR BATTANI (Through interpreter): Hello,
7	everybody. Thank you all for coming. Thank you for
8	your time. My name is Victor B-a-t-t-a-n-i.
9	I am an engineer. Currently I don't have
10	work. I used to be an engineer, so I am waiting for a
11	job interview, and I asked for an interpreter who is
12	highly qualified because there is a lot of the
13	technical terminology. The interpreter came in. And
14	they were very fluent. So I had told them they
15	weren't familiar with that word, it was kind of a
16	last-minute deal because I was going in for my
17	interview. And I said, you know, next time we need to
18	make sure that we have the certain certifications for
19	certain arenas, be it medical, court, whatever it is,
20	and that we need to bring in the best interpreters
21	possible.
22	There is some deaf people come in with an
23	interpreter, and I would like to see all interpreters
24	required to show their certification before they start

interpreting so that the deaf person is prepared and

1	they know. Because deaf people just walk in and they
2	get what they take, but if they show the certification,
3	they can make a decision.
4	All interpreters, your eyes, your ears, your
5	emotion, your mental state, you have that connection
6	with the interpreter because the interpreter is part of
7	the process. When you have a VRI interpreter, all of
8	that is missing.
9	So I am hoping that you please pass 204.
10	Thank you.
11	DIRECTOR WESAW: Okay. Our last four
12	speakers. If we had anybody else come to register,
13	they will have to come sign a statement. These are the
14	last four. They should take us to the 12:15 mark.
15	Marty Miracle, Susan Lundy, Diane Bass, and Janet
16	Jurus.
17	MARTY MIRACLE (Through interpreter): Hello,
18	everybody. Good morning. My name is Marty, M-a-r-t-y,
19	Miracle, M-i-r-a-c-l-e.
20	And I work here at MSD. I have four things
21	to say as time permits.
22	First thing I want to talk about is my
23	brother-in-law, a deaf man. My sister married him,
24	lived in Bay City, Michigan. There is, you know, one
25	hospital up there compared to here, you only have four

Τ	or five, but up there in Bay City, there is one
2	hospital.
3	In terms of health problems, very sick. Went
4	to the hospital, hard time breathing, really short of
5	breath. They brought the daughter. They asked the
6	daughter to interpret, who had been there several times
7	to the hospital with them, he was having a hard time
8	breathing, trying to figure out what was going on.
9	They found out it was a breathing issue. So they gave
10	him an inhaler. Said, hey, go home.
11	You know, same day, same day, more trouble,
12	breathing didn't improve. Said, hey, you know, had the
13	son, please drive me to Ann Arbor University of
14	Michigan Hospital. Bay City to Ann Arbor. You know
15	how long a drive that is. Right? I mean, that's
16	definitely more than an hour; more like two hours. So
17	the son said, okay, he got in the car, drove all the
18	way down to Ann Arbor. And he is like, hurry up, he
19	has got the window down because he can't get air, he
20	can't breathe. They pull into ER, people come out, he
21	gets out, and died right there in front of the car.
22	So let's go back. You know, get an
23	interpreter. Maybe if he had had an interpreter at the
24	initial hospital, he would still be alive.
25	I lived in Kentucky. I worked for the post

L	office. I got sick; was having some issues, having
2	some chest pains. Little tiny hospital. I live in a
3	rural town. And I thought, no. I need to go to a big
1	hospital, University of Louisville Hospital, so I went
5	there.

2.1

Boom, they had an interpreter right away.

And I heard about the, you know, interpreter, they knew that I was, you know, having chest pains. And I am trying not to think about what happened with my brother—in—law. I went in there. They diagnosed, worked on me, and decided that they were going to keep me overnight.

Didn't need -- at nighttime, time to go to bed, hey, interpreter, see you in the morning, didn't need him overnight.

Next morning, I had the same interpreter, which was great, he knew my history, he knew my situation, my history. If I got another interpreter, you have to explain all over again, why you are here, what's happening, while they're trying to give you meds, check me and do things and, you know, they were going to have to put a stent in or explain to me different procedures I might have to have, you know, and I had some questions about that. And the interpreter was able to explain them.

1	And then they said, well, the interpreter car
2	go with you to the operating room. They will scrub in.
3	Put the little hat on and go with you. I thought, wow.
4	I have never heard of that. They said, yeah, we do it
5	all the time. You know, they already had a good
6	relationship. They knew me from last night. It was
7	the same interpreter.

2.1

I get into the operating room, and they have got me all gowned up, and they said, do not move at all except your hand. So I said, okay. Interpreter came in. Interpreter said, you know, 1 to 10, what's your pain? Tell me. As they are working on me. So I waited and waited, and, you know, I said okay, it is a 5 to 7, it is an 8, anxious, the interpreter explaining to them, it got up to where it was a 10. I said, it is a 10. The interpreter interpreted it, and then we found out is when they went up in there, to put the stent in, there was an air bubble. They made a mistake. They had to get the air bubble before it reached my heart.

Imagine if that was VRI and I am signing one-handed over the screen. I don't know, maybe I wouldn't be here either today.

Get rid of VRI. Much easier for me to stand here with the interpreter, can look over me, we have a

	Page 99
1	relationship, they know my sign, they can move, we can
2	understand each other.
3	My time is done. Okay. Thank you very much.
4	SUSAN LUNDY (Through interpreter): Hello.
5	My name is Susan Lundy, L-u-n-d-y.
6	And I want to say thank you, first of all.
7	Well, back up a second. The rules and regs, who are
8	those established for? For the deaf. For the hard of
9	hearing. For the DeafBlind. I mean, really, you know,
10	it is based on them. It is not based on what hearing
11	people need. It is based on what most deafs need.
12	Sure. Rules and regs committee, you know,
13	that group of people know what's best for our
14	community. You know, it is not based on what's best
15	for the hearing community. It is based on what's best
16	for us. Many, many, many years of struggle and
17	experiences that have been baked into these rules and
18	regs, you know, and changed, enhanced, and it still
19	isn't passed. Here we are again. So now I notice a
20	few things that in the final draft last year is a
21	little different.
22	And first of all, I want to thank you two for
23	coming, for helping with the rules and regs. I know
24	you have been involved. I know you two haven't been

involved, so I guess thanks for being here and

2.1

2	I noticed last year, I said it then, I am
3	going to say it again, these categories for
4	interpreters must have qualifications, certified for
5	medical or with an endorsement for legal, yes, I stand
6	by that. I think it is great.

I have seen many of my clients frustrated with lousy interpreters who can't sign, don't have the medical experience. Not qualified. Oh, my clients understand them. Sometimes I have to interpret like a CDI, certified deaf interpreter, to make sure they understand, but I still stand by those requirements.

And also I have noticed a little bit of a change with these rules and regs asking the interpreter -- well, I think about requesting an interpreter. You know, before I think it was supposed to be three days mentioned, and now it is very ambiguous. I mean, does that mean that if I -- well, my understanding is if I asked for an interpreter three days ahead of time, or if I waited until -- by the second or third day, the interpreter is not there or they left or whatever, I can file a complaint. But I notice that, you know, I should be able to file a complaint with the agency who didn't give me an interpreter ahead of time. As it stands right now, it

2.1

Page 101

is very vague. So does that mean that if I ask you to
interpret at the last minute, then you don't have to
give me an interpreter because you can say, well, I
can't because you are asking me at the last minute.
Does that mean I have got to file a complaint against
the agency? Can anyone file complaints against an
agency for a last-minute request except in emergency
situation, police, ambulance, medical, something like
that?

I mean, it is important, you need an interpreter at the last minute, but who says if I don't ask with at least three days advanced notice, that it doesn't matter? So if I ask at the last minute, they will give me an interpreter, is that -- well, sorry, well, fine, I will be filing complaints away. You know, and I do admit that sometimes I ask for interpreters at the last minute. There has been a few times when I didn't get interpreters, and I know it is my fault because I didn't ask ahead of time. So therefore it should be in there, that three-day provision, you know, two weeks, three weeks, whatever. You know, so I am afraid it is vague, it is going to cause some major misunderstandings, and there's going to be all kinds of filings of complaints.

I think it needs to be put back to a

	Page 102
1	three-day time limit, a three-day notice that you need
2	an interpreter. That needs to be back.
3	And again, thank you.
4	DIANE BASS (Through interpreter): Hello,
5	everyone. My name is Diane Bass, B-a-s-s.
6	And I am here to talk about what happened, ar
7	experience I had which you need to understand, you
8	know, to make these changes to the rules and regs.
9	I go to school. My goal is to become a
LO	registered nurse, or maybe something in psychology.
L1	First semester, I went to school, I requested
L2	an interpreter. I requested a skilled, qualified
13	person who could interpret. I went to class and the
L 4	interpreter came in, and they signed ESL, English. And
15	I said, are you serious? Is that what you are giving
L 6	me? An English signing interpreter? I don't
L 7	understand that. I said, hey, I am sorry, I need a
L 8	different interpreter.
L 9	So I got a different interpreter. They were
20	not professional. They didn't follow the code of
21	ethics. They were chatting with the teacher while I am
22	sitting there.
23	And I said, okay, we need another agency, we
2 4	need a different interpreter. They said, well, we

can't, we have a contract with that agency. And I

	Page 103
1	said, so, we need to change the agency, get a different
2	interpreter, you know, this is my education. I am not
3	interested in failing because you are providing me the
4	wrong interpreter.
5	And they finally changed to a different
6	agency for me. And from then on, I passed with a 3.5
7	GPA. I was on the Dean's list. And I graduated. And
8	now I am at the university.
9	One thing I noticed in schools, regard to
10	interpreters, we need an amendment there for
11	interpreters to have knowledge about certain courses,
12	like science, they don't know the terminology. They
13	need to have that. They need to have the skills to
14	match the class. They need to have enough knowledge so
15	they can sign those terms for me.
16	And secondly, I am a deaf mentor for deaf
17	students who have hearing parents. Really I have to go
18	to IEP with them at the elementary school. And
19	unfortunately, those teachers and the principal who,
20	you know, are looking down on deaf people like they
21	can't, I think the teachers, the principals, they need
22	to be more respecting. They need to have
23	qualifications. They need to be able to sign, because
24	my observations with deaf children, is your signing

stinks, the kids do not understand you when they do.

Page 104 No, they don't, they don't understand, you need to 1 2 sign. That needs to be in there. They need to get CEUs, just like everybody 3 4 else, whether you work for the nurses or doctors, they 5 all have to have credits. I had to be certified, you know, if I wanted to be an RN. If I want to be a case 6 7 manager, I have got to be certified, you know, that 8 should apply to teachers and interpreters, as well. 9 There is really no excuse. So my point is, my suggestion is, that you 10 add those amendments, and teachers, well, they need to 11 12 be qualified in ASL. Better education for our 13 children, better for our clients and customers. Interpreters is not just for the deaf, it is also for 14 15 the hearing people. How are you going to understand 16 me? You are not going to be able to understand me. need one; you need one. 17 18 JANET JURUS (Through interpreter): Hello. 19 Love you. Say I love you back. 20 For the record, I would like to see this on 2.1 the record, I support the standards, the rules for me as an interpreter. Some of these are about me. 22 23 I want to back up. My name is Janet Jurus,

I support the standards and rules for myself

24

25

J-u-r-u-s.

1	as an interpreter. I believe somebody should be
2	mentoring me. I have no problem with that. You need
3	to have a system established to watch me as an
4	interpreter.

2.1

You know, for those of you that are working here as interpreters or any other place, there are standards, a complaint system, people that watch things. I think it is important. You need to know how to file a complaint, you need to know that I am meeting — that I follow the ethics. I don't have a problem with it; support it a hundred percent. Just like teachers, social workers, RN, watch me, I don't care.

Page 105

What are interpreters for? My parents. Why do I support the standards? There is a reason. I mean, for me too, right? But also for my parents, who have never had or haven't had qualified interpreters forever. Dad was born in 1927. He didn't have an interpreter.

I went to school, both deaf school, public schools. Who interpreted teacher conferences? I did. All through my growing up. He should have the right to access. He is 86 years old; doesn't matter. And that's why I support the standards and the rules, for me as an interpreter, for you, you, you, you, you, and

	Page 106
1	the rest of you interpreters, you know, interpreters in
2	the state of Michigan.
3	Secondly, I would like to ask MCR to look at
4	VRI, specifically rule number 55, number 1 and number
5	7. It says that if you live in Michigan, then you must
6	follow, you know, this, this, this, very strict rules
7	for qualified interpreters. For out-of-staters, they
8	have lower standards than VRI. Lower requirements.
9	Those standards should be the same as if I was working
10	as a certified interpreter, with the endorsements, with
11	everything, you know, registering with MCR, everything,
12	it should be here, you know, 7 of the 55, that's a
13	conflict, number 1, interpreters out of the state of
14	Michigan. So please look at number 55.
15	How many days since the amendment? 2,471.
16	It is time. Thank you.
17	(Applause).
18	DIRECTOR WESAW: Okay. Almost perfect
19	timing. We started about 12:20 or 9:20. It is now
20	12:20. We were scheduled, we started late, I wanted to
21	go late, and I want to declare the public hearing is
22	closed. The record will remain open for comment until
23	5:00 p.m. on Monday, April 7, 2014, that's this Monday,
24	for any additional written or videotaped ASL comments
25	on those rules.

Page 107 Thank you for your patience and cooperation. And most importantly, for taking the time to participate in this process and sharing your perspectives. Safe travels home. That's the official end for the record. (Proceedings concluded at 12:22 p.m.)
